Contests of Chaos

Designer Playtest Transcript

Date: March 14, 2026
Seed: 29 | **Players:** 3 | **Playbooks:** Enabled
Session: 8c596427
Winner: Player1 (35 VP)

Final Standings

Rank	Player	Event VP	Playbook VP	Shiny Bonus	Total
1	Player1	35	0	0	**35**
2	Player3	15	0	3	**18**
3	Player2	6	4	2	**12**

Setup Phase

Phase: setup_starting_playbooks, setup_starting_roster

LINEUP (DRAFT MARKET)

Slot 1 (FREE)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
RED-9	BLU-0 *	GRN-3	RED-5

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 47 | Event Deck: 33 | The Stands: 0

SCOREBOARD

Player1 **1 VP** Event: 0 | PB: 0 | Shinies: 3
Hand: YLW-10 * YLW-0 * YLW-4

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: RED-1 RED-6 YLW-6
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 *
Playbooks: The Speed Run (3VP)

Player1 Thinking:

CANDIDATES: Option 1: Keep YLW-10, YLW-0, YLW-4 (two Free Agents + one signed Tinkerer). This gives me two Free Agents which are the most flexible cards in the game, plus a mid-rank Tinkerer. YLW-10 (rank 10) and YLW-0 (rank 0) can count as ANY faction, making them incredibly versatile for any event. YLW-4 as signed Tinkerer gives me a Buddy for Tinkerer events. Sum of 10+0+4=14. Option 2: Keep YLW-10, YLW-0, YLW-3 (two Free Agents + lower Tinkerer). Similar flexibility but YLW-3 gives less sum potential than YLW-4. Sum 10+0+3=13. Option 3: Keep YLW-10, PUR-4, YLW-4 (one Free Agent + two factions). Gives me Time Travelers and Tinkerers coverage but only one Free Agent. Less flexible overall. **TABLE:** No opponents have cards yet since this is setup. All players start equal. The Jumbotron has Soapbox Derby (9 VP, needs 3 Tinkerers + 2 Free Agents Sum>=22), Convoy (6 VP, 3-card run), Limbo Contest (8 VP, 4 cards Sum<=8), and Tug of War (3 VP, 3 Super-Dupes). With my Tinkerer-heavy draw, Soapbox Derby is a natural long-term target. Limbo Contest could also be possible if I collect low-rank cards since YLW-0 starts me at 0. **PLAN:** My strategy is to start with maximum flexibility. Two Free Agents (YLW-10 and YLW-0) give me the ability to pivot to whatever faction events come up. YLW-4 as a signed Tinkerer gives me a Buddy for Tinkerer events and decent rank for sum requirements. I will look to complete the Soapbox Derby as a long-term goal (need 2 more signed Tinkerers + 1 more Free Agent), while being ready to pivot to smaller events using my Free Agents. I keep YLW-4 over YLW-3 because the extra rank point matters for Sum>=22 requirements. I discard PUR-4 (only useful for Time Travelers, which I have no other TT cards for) and YLW-3 (lower value than YLW-4 and redundant as a Tinkerer). **DECISION:** Keep YLW-10, YLW-0, YLW-4. Two Free Agents maximizes flexibility across all factions. YLW-4 provides Tinkerer Buddy status and higher rank than YLW-3 for sum requirements. This sets up Soapbox Derby pursuit while keeping all options open.

Player1 `setup_keep_roster` (keepIndices=[0, 2, 4])
Player1 locked in a starting roster.

Player2 Thinking:

CANDIDATES: My 5 starting cards are RED-1 (Super-Dupes rank 1), RED-2 (Super-Dupes rank 2), RED-6 (Super-Dupes rank 6), YLW-6 (Tinkerers rank 6), and GRN-8 (Prognosticationers rank 8). I need to keep 3 and discard 2. Let me evaluate the key combinations:

Option A: Keep RED-1, RED-6, YLW-6 (indices 0,2,3). This gives me diversity across Super-Dupes and Tinkerers, with a low-rank card (RED-1) useful for Limbo Contest and a high-rank card for sum requirements. RED-6 and YLW-6 give solid mid-range values. RED-1 is extremely valuable for Limbo Contest (8VP, 4 cards sum<=8) and can help with Convoy (run of consecutive ranks if I get a RED-2 back). The Tinkerer helps toward Soapbox Derby.

Option B: Keep RED-2, RED-6, GRN-8 (indices 1,2,4). Two Super-Dupes plus a Prognosticationer. The GRN-8 is high value for sum events but bad for Limbo. RED-2+RED-6 dont form a run. This is more of a sum-oriented build.

Option C: Keep RED-1, RED-2, RED-6 (indices 0,1,2). Three Super-Dupes immediately enables Tug of War (3VP, 3x Super-Dupes) on the Jumbotron! But Tug of War is only 3VP and I would be spending all three starting cards. The reward is 3 Shinies which is nice. But this is mono-faction and inflexible.

Option D: Keep RED-6, YLW-6, GRN-8 (indices 2,3,4). Diverse factions, high ranks (sum 20), good for events with sum requirements. But no low cards for Limbo and no runs possible.

TABLE: The Jumbotron has Limbo Contest (8VP, 4 cards sum<=8) which is very attractive. Low-rank cards are crucial for this. Tug of War (3VP, 3x Super-Dupes) is completable if I keep three reds but low value. Convoy (6VP, 3-card run) needs consecutive ranks. Soapbox Derby (9VP) needs 3 Tinkerers and 2 Free Agents which is far off.

PLAN: I want to build toward Limbo Contest (8VP) as a medium-term goal since it rewards a great draft pick too. RED-1 is essential for that. I also want faction diversity for Opening Ceremony type events later. YLW-6 gives me Tinkerer coverage. RED-6 gives me strong sum contribution and Super-Dupes coverage. I will discard RED-2 and GRN-8 -- RED-2 is redundant with RED-1 for Super-Dupes coverage, and while GRN-8 is high rank, I can draft Prognosticationers later.

DECISION: Keep RED-1, RED-6, YLW-6 (indices 0,2,3). RED-1 is my Limbo Contest enabler (value 1 toward sum<=8). RED-6 gives strong sum contribution (value 6) and maintains Super-Dupes presence for Tug of War if I draft more. YLW-6 opens Tinkerer faction access for events like Soapbox Derby and Drag Race. This gives me two factions, a low card for Limbo, and good sum flexibility. Discarding RED-2 (redundant low Super-Dupes) and GRN-8 (replaceable high-rank card).

Player2 `setup_keep_roster` (keepIndices=[0, 2, 3])

Player2 locked in a starting roster.

Player3 Thinking:

CANDIDATES: The key choice is which 3 of 5 cards to keep. Let me evaluate the top options:

Option 1: PUR-5, PUR-7, ORG-10 (keepIndices [1,2,4]). Two Time Travelers and a Free Agent. PUR-5 and PUR-7 give me a pair of Time Travelers which is good for Red Light Green Light (3x Time Travelers) or higher tier Time Traveler events. The ORG-10 Free Agent is extremely versatile - it can count as any faction while contributing rank 10 to sums.

Option 2: PUR-5, YLW-9, ORG-10 (keepIndices [1,3,4]). This gives me diverse factions and high ranks. YLW-9 is great for Soapbox Derby on the Jumbotron (needs 3x Tinkerers + 2 Free Agents, Sum >= 22). The PUR-5 + YLW-9 are consecutive ranks (5-6-7-8-9 range) useful for runs like Convoy. ORG-10 is a Free Agent filling any gap.

Option 3: PUR-7, YLW-9, ORG-10 (keepIndices [2,3,4]). Higher total ranks (7+9+10=26) but less faction diversity. Good for high-sum events.

TABLE: This is setup so no opponent info yet. The Jumbotron has Soapbox Derby (9 VP, 3x Tinkerers + 2 Free Agents Sum >= 22) which my YLW-9 partially serves. Convoy (6 VP, 3-card run) is achievable with consecutive numbers. Limbo Contest (8 VP, 4 cards Sum <= 8) needs low cards I do not have.

PLAN: I want to keep cards that are versatile and high-value. ORG-10 as a Free Agent is a must-keep. Between PUR-5/PUR-7, keeping PUR-5 gives me a mid-range card that pairs well for runs. YLW-9 is strong for the Soapbox Derby event and has high rank for sum requirements. I want faction diversity to stay flexible for whatever events appear.

DECISION: Keep PUR-5, YLW-9, ORG-10. This gives me: a mid-rank Time Traveler (useful for many events), a high-rank Tinkerer (partial progress on Soapbox Derby which is 9 VP), and a Free Agent (ORG-10, the most flexible card possible). Total rank sum of 24 is strong. I sacrifice the ORG-3 (low rank, narrow faction) and PUR-7 (redundant with PUR-5 for Time Travelers). This keeps me open to many event types while having good sum potential.

Player3 `setup_keep_roster` (keepIndices=[1, 3, 4])

Player3 locked in a starting roster.

Player2 Thinking:

CANDIDATES: Two playbook options. The Perfect 10 (4VP, Combo: complete an event using at least one Rank 10 card) vs The Salary Cap (3VP, Finish: end of turn with exactly 0 Shinies).

The Perfect 10 is worth 4VP vs only 3VP for Salary Cap. The condition is straightforward -- I just need to draft a rank 10 Free Agent and use it in an event. Free Agents are already valuable cards I would want to acquire anyway, so this playbook aligns with good play. Rank 10 cards have high sum value too, making them useful for Sum>=12 and Sum>=22 events.

The Salary Cap requires ending a turn with exactly 0 Shinies, which is awkward to engineer. I start with 4 Shinies. I would need to spend them all in one turn (e.g., Slot 4 costs 3 + 1 more somehow, or Scramble costs 2 + something). It constrains my play and only gives 3VP.

TABLE: No information yet about opponents. At this early stage I want maximum flexibility.

PLAN: The Perfect 10 naturally aligns with drafting Free Agents (rank 0 and 10), which are already the most versatile cards in the game. Any time I complete an event using a rank 10 card, I score this playbook. This gives me incentive to pursue Free Agents, which is already optimal strategy.

DECISION: Keep The Perfect 10 (4VP). Higher VP value, easier to achieve naturally since Free Agents are already premium draft targets. The Salary Cap is lower VP and forces awkward Shiny management.

Player2 `setup_keep_playbook` (keepIndex=0)

Player2 kept 1 starting Playbook.

Player3 Thinking:

CANDIDATES: Two Playbook options:

1. The Underdog Story (4 VP) - "Complete an Event while you have 2+ fewer completed Events than the leader." This is a Combo timing playbook worth 4 VP. The condition requires me to be 2+ events behind the leader when I complete an event. This is situational - I would need to fall behind in event count, which is risky because falling behind means I may lose. Also, in a 3-player game, it is hard to predict if I will be far enough behind. It rewards a comeback strategy but forces a passive early game.

2. The Speed Run (3 VP) - "Complete an Event using 3 or fewer cards." This is a Combo timing playbook worth 3 VP. Many events in the game use 3 or fewer cards: all Tier 1 events use exactly 3 cards (Tug of War, Drag Race, Easter Egg Hunt, etc.), Rivalry Week uses 2 cards, Convoy uses 3, Photo Finish uses 3, Substitution uses 3, Sudden Death uses 3. This is very achievable since most lower-tier events naturally use 3 cards.

TABLE: No opponent info yet. Both playbooks are Combo timing, meaning I score them when the condition is met during an event completion. The Underdog Story requires a specific board position; The Speed Run just requires completing a small event.

PLAN: The Speed Run at 3 VP is easier to trigger and does not require me to play from behind. Almost any Tier 1-3 event I complete will satisfy it (3 cards or fewer). It synergizes with my current hand which has 3 cards - I could potentially complete a 3-card event early. The Underdog Story requires falling behind which conflicts with a winning strategy.

DECISION: Keep The Speed Run (3 VP). It is much more reliably achievable - I just need to complete any event using 3 or fewer cards, which includes dozens of events in the deck. The Underdog Story is higher VP but situational and risky. The Speed Run lets me play aggressively from the start while still scoring the playbook bonus.

Player3 `setup_keep_playbook` (keepIndex=1)

Player3 kept 1 starting Playbook.

Player1 Thinking:

CANDIDATES: Option 1: The Rookie (3 VP) - Complete an event using only Ranks 1-5. This is a Combo playbook meaning I score it when the condition is met during event completion. Many tier 1-2 events need 3 cards of a faction, and ranks 1-5 are common in the deck. With 11 cards per faction (0-10), ranks 1-5 make up 5/11 of each faction. Very achievable. Option 2: The Windfall (3 VP) - End of turn with 8+ Shinies. This requires massive Shiny hoarding. Starting at 3, I would need to gain 5+ Shinies without spending, which means multiple Timeouts and avoiding Lineup drafts. This conflicts with my need to draft cards to complete events. **TABLE:** Early game. No opponent info yet. Both playbooks are worth 3 VP. The question is which condition I can more naturally achieve without distorting my strategy. **PLAN:** The Rookie fits naturally into my game plan. I will be drafting low-to-mid rank cards anyway for events like Limbo Contest (Sum<=8) or various tier 1-2 events. Completing a small event using only ranks 1-5 is very doable and does not require me to change strategy. The Windfall would force me to hoard Shinies and avoid spending, which slows down my drafting tempo. **DECISION:** The Rookie. It is achievable without distorting my core strategy. Many tier 1 events (3 cards of one faction) can be completed with ranks 1-5 naturally. The Windfall would require me to sacrifice tempo by not drafting, which conflicts with the need to build toward events quickly.

Turn 1 — Player1

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
RED-9	BLU-0 *	GRN-3	RED-5

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 47 | Event Deck: 33 | The Stands: 6

SCOREBOARD

Player1 **1 VP** Event: 0 | PB: 0 | Shinies: 3
Hand: YLW-10 * YLW-0 * YLW-4
Playbooks: The Rookie (3VP)

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: RED-1 RED-6 YLW-6
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 *
Playbooks: The Speed Run (3VP)

Player1 `setup_keep_playbook` (keepIndex=0)
Player1 kept 1 starting Playbook.

Player1 Thinking:

CANDIDATES: 1. Draft BLU-0 (Slot 2, cost 1 Shiny): Adds a third Free Agent to my hand. BLU-0 is rank 0, which is perfect for Limbo Contest (4 cards Sum<=8). With YLW-0 + BLU-0 + YLW-4 I would have sum 4 across 3 cards, needing only one more card of rank 0-4 to complete Limbo Contest for 8 VP. Three Free Agents also gives me massive faction flexibility for future events. 2. Draft RED-9 (Slot 1, free): A Super-Dupes rank 9 is a strong card for sum requirements, and free is great. But I have no other Super-Dupes cards, so Tug of War (3 VP, needs 3 Super-Dupes) is far away. The high rank also hurts Limbo Contest chances. 3. Timeout for 1 Shiny: Conservative play. Build Shinies to 4 for future drafts. But this wastes a turn when a premium Free Agent is available in the Lineup. **TABLE:** All three players start with 3 cards. Opponents have 4 Shinies each. No one has completed events yet. The Jumbotron has Soapbox Derby (9 VP) which I am naturally positioned for with my Tinkerer cards, Limbo Contest (8 VP) which I am building toward with my low-rank cards, and Convoy (6 VP) which needs a 3-card run. My opponents likely have mixed faction cards from their drafts. No one can complete anything yet with only 3 cards. **PLAN:** Drafting BLU-0 gives me the Limbo Contest path as my primary target. After this draft I will have YLW-10, YLW-0, YLW-4, BLU-0 (4 cards, sum 10+0+4+0=14, too high for Limbo). But using YLW-0 + BLU-0 + YLW-4 + any rank-0-to-4 card = sum <= 8. I need to draft one more low card. My Playbook The Rookie (event using only ranks 1-5) would be scored if I complete an event with all ranks 1-5. YLW-4 is rank 4, BLU-0 is rank 0 (not 1-5), YLW-0 is rank 0. So The Rookie would need me to complete an event exclusively with ranks 1-5, meaning no Free Agents. Thats a separate goal. For now, Limbo Contest at 8 VP is the priority. **DECISION:** Draft BLU-0 from Slot 2 for 1 Shiny. This is the highest-value play because: (a) Free Agents are the most flexible cards in the game, (b) BLU-0 at rank 0 is perfect for Limbo Contest, (c) three Free Agents gives me faction coverage for almost any event, (d) only costs 1 Shiny leaving me with 2 for future moves. The 1 Shiny placed on RED-9 in Slot 1 may make it attractive to opponents, drawing their attention away from my plans.

Turn 2 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
RED-9	GRN-3	RED-5	GRN-5

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 46 | Event Deck: 33 | The Stands: 6

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 2
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 *
Playbooks: The Rookie (3VP)

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: RED-1 RED-6 YLW-6
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 *
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=2)
Player1 drafted BLU-0 from Lineup Slot 2 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: Three main options to consider:

1. Draft RED-9 from Slot 1 (FREE + collect 1 shiny on it). This gives me a third Super-Dupe (RED-1, RED-6, RED-9) enabling Tug of War (3VP) on a future turn. Net economy: +1 card, +1 shiny. Tug of War reward is 3 more shinies, so the full sequence nets me 3VP + 3 shinies. RED-9 also contributes high sum value for events like Wheelbarrow Race or King of the Hill later.

2. Draft GRN-3 from Slot 2 (cost 1 shiny, puts 1 on RED-9). This gives me Prognosticationer coverage and a low-rank card (rank 3) useful for Limbo Contest. But it costs 1 shiny and delays Tug of War since I still need a third Super-Dupe. Also GRN-3 alone does not unlock any immediate event.

3. Timeout (take 1 shiny, optionally discard/flush). Gives me 5 shinies and perhaps flushes Soapbox Derby from Jumbotron Slot 1. But I do not need more shinies right now -- I need cards to complete events. Passing is wasteful when a free draft is available.

TABLE: Player1 drafted BLU-0 (Magicians Free Agent) from Slot 2 last turn, spending 1 shiny (now at 2 shinies, 4 cards). Player1 likely has the free agent for flexible faction coverage. Player3 has not yet acted (3 cards, 4 shinies). Neither player has scored any events yet. No one is threatening to complete Tug of War immediately since they would also need 3 Super-Dupes. Player1 having BLU-0 gives them flexibility for any event requiring Magicians.

PLAN: My short-term plan is to build toward Tug of War (3VP, easy to complete) as my first event. I need 3 Super-Dupes and I have RED-1 and RED-6. Drafting RED-9 for free gives me all three. Next turn I can either complete Tug of War (spending RED-1 + RED-6 + RED-9 for 3VP and 3 shinies) or wait to see what new events appear. The 3 shinies reward from Tug of War will fund future drafts. Meanwhile, YLW-6 stays in hand for Tinkerer events later. My playbook The Perfect 10 requires a Rank 10 Free Agent, so I will keep an eye out for those in future lineups.

DECISION: Draft RED-9 from Slot 1 for free, collecting the 1 shiny sitting on it. This is the highest-value action available: zero cost, +1 card, +1 shiny, and it immediately enables Tug of War completion next turn. No other action offers comparable tempo. The free card advantage is too good to pass up, and having 3 Super-Dupes ready gives me a guaranteed 3VP event whenever I choose to pull the trigger. I go to 5 shinies and 4 cards in hand (RED-1, RED-6, RED-9, YLW-6).

Turn 3 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
GRN-3	RED-5	GRN-5	GRN-1

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 45 | Event Deck: 33 | The Stands: 6

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 2
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 *
Playbooks: The Rookie (3VP)

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: RED-1 RED-6 YLW-6 RED-9
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 *
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted RED-9 from Lineup Slot 1 and collected 1 Shinies.

Player3 Thinking:

CANDIDATES: Looking at my options this turn:

1. Draft GRN-3 from Slot 1 (free). This gives me a Prognostictioner rank 3, adding faction diversity. With PUR-5, YLW-9, ORG-10, adding GRN-3 gives me 4 different factions which is useful for Opening Ceremony (7 VP, 4 different factions). The rank 3 is also low enough to be useful for Limbo Contest (4 cards Sum <= 8) if I get more low cards. Combined with ORG-10 as Free Agent, GRN-3 expands my options significantly.

2. Draft RED-5 from Slot 2 (costs 1 Shiny). A Super-Dupes rank 5. This would give me a 4th faction but costs a Shiny. Having PUR-5 and RED-5 (both rank 5) could be useful for events needing pairs or same-rank sets. But Super-Dupes are primarily useful for Tug of War (3x Super-Dupes) which only pays 3 VP. One Super-Dupes card alone does not get me close.

3. Timeout (gain 1 Shiny). This brings me to 5 Shinies. Could flush Soapbox Derby from Jumbotron Slot 1 to bring in new events. But with only 3 cards in hand, I need more cards, not more Shinies right now.

TABLE: Player1 has 4 cards and 2 Shinies - they likely drafted from Slot 2 previously (spent 1 Shiny). Player2 has 4 cards and 5 Shinies - they called a Timeout (gained a Shiny, went from 4 to 5). Neither has scored any events yet. The board is wide open. The Lineup is heavy on Prognostictioners (GRN-3, GRN-5, GRN-1) which suggests Guessing Booth (3x Prognostictioners) or Strategy Meeting could become accessible.

PLAN: I need to build my hand toward completing events. My current hand (PUR-5, YLW-9, ORG-10) has high sum potential (5+9+10=24) but lacks faction concentration. My Speed Run playbook rewards completing events with 3 or fewer cards, so Tier 1-2 events are ideal targets. Drafting GRN-3 for free gives me a 4th card with a 4th faction, positioning me for Opening Ceremony (4 different factions, 7 VP) which uses exactly 4 cards (satisfying "4 or fewer" for Goldilocks-type combos). With PUR-5, YLW-9 (as non-Prognostictioner), ORG-10 (Free Agent counting as some other faction), and GRN-3 I would have 4 different faction symbols.

DECISION: Draft GRN-3 from Slot 1 for free. This is the best value play - costs 0 Shinies, adds faction diversity, and the low rank 3 is useful for sum-constrained events like Limbo Contest. It preserves my 4 Shinies for future expensive drafts. Getting a free card is always good tempo, and Prognostictioners are a strong faction with good events (Guessing Booth, Hide and Seek, Strategy Meeting). After this I will have 4 cards with good factional spread (PUR, YLW, ORG, GRN).

Turn 4 — Player1

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
RED-5	GRN-5	GRN-1	PUR-2

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 44 | Event Deck: 33 | The Stands: 6

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 2
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 *
Playbooks: The Rookie (3VP)

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: RED-1 RED-6 YLW-6 RED-9
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 * GRN-3
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted GRN-3 from Lineup Slot 1 and collected 0 Shinies.

Player1 Thinking:

CANDIDATES: 1. Draft GRN-1 (Slot 3, cost 2 Shinies): This is the missing piece for Limbo Contest. With GRN-1 I would have YLW-0 (0) + BLU-0 (0) + YLW-4 (4) + GRN-1 (1) = sum 5, which is <= 8. Next turn I can complete Limbo Contest for 8 VP and get a free Slot 2 draft as the reward. This is incredibly high value. 2. Draft RED-5 (Slot 1, free): Free card is always tempting, but RED-5 is rank 5 which does not help Limbo Contest (would push sum to 9 or higher). I have no other Super-Dupes so Tug of War is far away. 3. Draft GRN-5 (Slot 2, cost 1 Shiny): Rank 5 Prognostications. Too high for Limbo Contest. Could help with sum-based events later but not worth the tempo cost compared to GRN-1. **TABLE:** Player2 has 5 Shinies and 4 cards. Player3 has 4 Shinies and 4 cards. Both had 0 completed events and 0 event VP. No one has scored yet. The Jumbotron still has Soapbox Derby (9 VP), Convoy (6 VP), Limbo Contest (8 VP), and Tug of War (3 VP). If opponents are drafting from the deck, they are likely building toward different events. The big concern is whether an opponent could also be targeting Limbo Contest -- but that requires four low-rank cards which is unusual to have this early. **PLAN:** Draft GRN-1 this turn. Next turn, complete Limbo Contest for 8 VP (using YLW-0, BLU-0, YLW-4, GRN-1 with sum=5). The Limbo Contest reward is drafting Lineup Slot 2 for free plus any Shinies on it. This gives me 8 VP plus a free card, all while spending no cards I am emotionally attached to (YLW-10 stays in hand as my premium Free Agent). After completing Limbo Contest, I will have YLW-10 remaining in hand plus the free Slot 2 card from the reward. Then I pivot to building for mid-tier events. Note that completing Limbo Contest uses three rank-0 and rank-1 cards plus YLW-4 (rank 4). The Rookie playbook requires all cards to be ranks 1-5. Since YLW-0 and BLU-0 are rank 0, this will NOT trigger The Rookie. I need a separate event with only ranks 1-5 for that. **DECISION:** Draft GRN-1 from Slot 3 for 2 Shinies. This sets up Limbo Contest completion next turn for 8 VP -- the second-highest event currently on the Jumbotron. The cost of 2 Shinies (all I have) is easily worth it for an 8 VP event next turn. The math is clear: sum 0+0+4+1=5<=8 with 4 cards. This is the most efficient path to early VP.

Turn 5 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S)
RED-5	GRN-5	PUR-2	ORG-1

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Tug of War **3 VP** Tier 1
3x Super-Dupes
Reward: Take 3 Shinies from The Bank.

Recruit Deck: 43 | Event Deck: 33 | The Stands: 6

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 0
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 * GRN-1
Playbooks: The Rookie (3VP)

Player2 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: RED-1 RED-6 YLW-6 RED-9
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 * GRN-3
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=3)
Player1 drafted GRN-1 from Lineup Slot 3 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: Three primary options this turn:

1. Complete Tug of War (3VP, reward: 3 Shinies). Use RED-1 + RED-6 + RED-9 to complete the 3x Super-Dupes requirement. This gives me 3VP immediately and 3 Shinies from the bank (going from 5 to 8 Shinies). I am left with YLW-6 and The Perfect 10 playbook in hand (2 cards total). Early VP is critical in this race to 30.

2. Draft RED-5 from Slot 1 for free (+ collect 1 shiny on it). This gives me a 4th Super-Dupe and pushes toward Shield Wall (4x Super-Dupes, Sum>=22, 10VP). But RED-1+RED-5+RED-6+RED-9 = sum 21, which is 1 short of 22. I would need more cards or a different combination. This delays scoring and may never pay off if Shield Wall does not appear on the Jumbotron or if I cannot hit Sum 22.

3. Hire Agent for 5 Shinies. I see Leave It On The Field (4VP, condition: 2 or fewer cards in hand after completing event this turn) and The Big Game (4VP, complete 9+ VP event). These are interesting but spending 5 Shinies without scoring any VP this turn is poor tempo. Also, I can only do one action, so I cannot both Hire Agent and Complete Event in the same turn.

TABLE: Player1 has 0 shinies and 5 cards -- they have been drafting aggressively and may be building toward an event completion soon. Player3 has 4 shinies and 4 cards, also building. Neither has scored yet. Scoring first gives me a psychological and mechanical advantage -- I set the pace and force them to react. Tug of War at 3VP is modest but it is the first score of the game.

PLAN: Complete Tug of War now for 3VP and 3 Shinies. This puts me at 3VP event score, 8 Shinies, and 1 recruit card (YLW-6) plus my playbook. My next priority is to draft aggressively to rebuild my hand. With 8 Shinies I can afford expensive Slot 3 or 4 cards. I should look for: (a) Rank 10 Free Agents to trigger The Perfect 10 playbook, (b) low-rank cards for Limbo Contest, (c) cards that match upcoming Jumbotron events. YLW-6 gives me Tinkerer base for Drag Race (3x Tinkerers) or other Tinkerer events.

DECISION: Complete Tug of War with RED-1, RED-6, RED-9 for 3VP + 3 Shinies. This is the strongest tempo play available. I score first in the game, gain 3 Shinies (net economy: 3VP + 3 Shinies for 3 cards), and the Shinies fuel future drafting to rebuild. Drafting RED-5 for free is tempting but delays scoring with no guaranteed payoff. Shield Wall is not even on the Jumbotron currently. Hiring The Agent costs 5 Shinies and scores 0VP this turn. The math is clear: 3VP + 3 Shinies now beats all alternatives.

Turn 6 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S)
RED-5	GRN-5	PUR-2	ORG-1

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Drag Race **3 VP** Tier 1
3x Tinkerers
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Recruit Deck: 43 | Event Deck: 32 | The Stands: 9

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 0
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 * GRN-1
Playbooks: The Rookie (3VP)

Player2 **5 VP** Event: 3 | PB: 0 | Shinies: 8
Hand: YLW-6
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 4
Hand: PUR-5 YLW-9 ORG-10 * GRN-3
Playbooks: The Speed Run (3VP)

Player2 `complete_event` (eventSlot=4, cardIds=['super_dupes_1', 'super_dupes_6', 'super_dupes_9'])
Player2 completed Tug of War [3 VP] with RED-1, RED-6, RED-9; reward: gained 3 Shinies.

Player3 Thinking:

CANDIDATES: My options this turn:

1. Draft RED-5 from Slot 1 (free + collect 1 Shiny). This is outstanding value - I get a free card AND gain a Shiny (going from 4 to 5). RED-5 is a Super-Dupes rank 5. With my current hand (PUR-5, YLW-9, ORG-10, GRN-3), adding RED-5 gives me 5 different factions. This means I have Opening Ceremony nearly within reach (4 cards showing 4 different factions, 7 VP). I would have PUR, YLW, ORG, GRN, RED = 5 factions. For Opening Ceremony I need 4 different faction symbols. I could use GRN-3 + RED-5 + PUR-5 + YLW-9 = 4 different factions. That is exactly Opening Ceremony (7 VP)! But wait, is Opening Ceremony on the Jumbotron? No - current events are Soapbox Derby, Convoy, Limbo Contest, Drag Race. So I cannot complete it now but should hold these cards for when it appears.

2. Draft GRN-5 from Slot 2 (costs 1 Shiny, Slot 1 gets another Shiny). This gives me a second GRN but I already have GRN-3. Two Prognosticationers plus ORG-10 (Free Agent) could get me toward Guessing Booth (3x Prognosticationers, 3 VP) eventually.

3. Draft PUR-2 from Slot 3 (costs 2 Shinies). A second Time Traveler. PUR-2 + PUR-5 gets me closer to Red Light Green Light (3x Time Travelers). The low rank 2 is also useful for Limbo Contest (Sum <= 8). With GRN-3 (rank 3) + PUR-2 (rank 2) + ORG-10 as Free Agent (rank 10, too high) + another low card, Limbo needs Sum <= 8 with 4 cards. But ORG-10 counts as rank 10 which blows the sum constraint. So Limbo is hard with my current cards.

TABLE: Player2 is ahead with 3 Event VP (Tug of War), 8 Shinies, but only 1 card in hand - they are rebuilding. Player1 has 0 VP, 0 Shinies, 5 cards - probably saving up for a big event. I am at 0 VP with 4 cards and 4 Shinies. I need to start scoring events soon. The Jumbotron currently has Convoy (3-card run for 6 VP) which is very attractive - I need 3 consecutive ranks. I have ranks 3, 5, 9, 10 in hand. If I pick up RED-5 (rank 5) I have two 5s but still need consecutive ranks like 3-4-5 or 4-5-6. I already have rank 3, so if I can get a rank 4, I would have 3-4-5 for Convoy.

PLAN: Draft RED-5 for free plus the bonus Shiny. This maximizes faction diversity (5 factions in hand) positioning me for Opening Ceremony when it appears on the Jumbotron. Having ranks 3, 5, 5, 9, 10 in hand means I need a rank 4 for a Convoy run (3-4-5). My Speed Run playbook triggers on completing events with 3 or fewer cards. Convoy uses exactly 3 cards which would trigger it. So my 2-turn plan is: pick up a rank 4 card next, then complete Convoy for 6 VP + 3 VP playbook = 9 VP in one shot.

DECISION: Draft RED-5 from Slot 1. Zero cost, gain 1 Shiny, gain a new faction (Super-Dupes). This is the best possible move - free card with bonus money. It builds my faction diversity and gives me a rank-5 card useful for sum requirements. Going to 5 Shinies gives me good purchasing power for future turns.

Turn 7 — Player1

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
GRN-5	PUR-2	ORG-1	BLU-9

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Limbo Contest **8 VP** Tier 3
4 cards with Sum ≤ 8
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Drag Race **3 VP** Tier 1
3x Tinkerers
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Recruit Deck: 42 | Event Deck: 32 | The Stands: 9

SCOREBOARD

Player1 **0 VP** Event: 0 | PB: 0 | Shinies: 0
Hand: YLW-10 * YLW-0 * YLW-4 BLU-0 * GRN-1
Playbooks: The Rookie (3VP)

Player2 **5 VP** Event: 3 | PB: 0 | Shinies: 8
Hand: YLW-6
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted RED-5 from Lineup Slot 1 and collected 1 Shinies.

Player1 Thinking:

CANDIDATES: 1. Complete Limbo Contest (8 VP): Use YLW-0 (0) + YLW-4 (4) + BLU-0 (0) + GRN-1 (1) = sum 5 <= 8. This scores 8 VP immediately and gives me a free Slot 2 draft (PUR-2, Time Travelers rank 2). After completion I keep YLW-10 plus get PUR-2, leaving me with 2 cards and 8 event VP. This is the most efficient possible play -- 8 VP from 4 cards is outstanding value. 2. Complete Drag Race (3 VP): Multiple combinations available using 3 Tinkerers. Best would be YLW-0 + YLW-4 + BLU-0 (with BLU-0 as Free Agent counting as Tinkerer, YLW-4 as Buddy). This scores only 3 VP versus 8 for Limbo Contest. The reward is also free Slot 2 draft. Clearly inferior to Limbo Contest. 3. Timeout for 1 Shiny: No reason to wait when I can score 8 VP right now. **TABLE:** Player2 is ahead with 3 event VP and 8 Shinies -- they completed an event already (Tug of War completed at some point, given it was on the Jumbotron). Player2 has only 1 card in hand, so they need to rebuild. Player3 has 0 event VP, 5 Shinies, 5 cards -- still building. I am behind both in VP. Completing Limbo Contest jumps me to 8 event VP, which would make me the leader by far. This is a crucial swing play. **PLAN:** Complete Limbo Contest now for 8 VP. This catapults me from 0 to 8 event VP, taking the lead over Player2 (who has 3). After completion, I will have YLW-10 (Free Agent, rank 10) and PUR-2 (from reward) in hand. I need to rebuild my hand to pursue more events. YLW-10 is premium because it can serve as a Free Agent in almost any event. My next priorities after scoring: (a) draft cards that build toward available events, (b) look for events I can score with The Rookie playbook (all ranks 1-5). Note: The Rookie cannot trigger on Limbo Contest because I used rank 0 cards (YLW-0, BLU-0 are rank 0, not ranks 1-5). But 8 VP without the playbook bonus is still far better than passing. **DECISION:** Complete Limbo Contest with YLW-0, YLW-4, BLU-0, GRN-1 for 8 VP. The math is clear: sum 0+0+4+1=5<=8 with 4 cards, meeting all requirements. This is a massive VP swing, putting me at 8 event VP and taking a commanding lead. The reward (free PUR-2 from Lineup Slot 2) adds a useful low-rank card to my hand. There is no reasonable alternative that comes close to this value.

Turn 8 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)

Hand: YLW-6
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5
Playbooks: The Speed Run (3VP)

Player1 `complete_event` (eventSlot=3, cardIds=['tinkerers_0', 'tinkerers_4', 'magicians_0', 'prognosticationers_1'])
Player1 completed Limbo Contest [8 VP] with YLW-0, YLW-4, BLU-0, GRN-1; reward: free-drafted Slot 2 (PUR-2).

Player2 Thinking:

CANDIDATES: The key options this turn:

1. Draft RED-10 from Slot 4 (cost 3 Shinies, places 1 on each of Slots 1-3). RED-10 is a rank 10 Super-Dupes Free Agent. This directly enables my The Perfect 10 playbook (4VP when I complete an event using a Rank 10 card). As a Free Agent, RED-10 can count as any faction, making it the most flexible card in the game. Combined with YLW-6 (my Tinkerer), RED-10 can count as a Tinkerer, putting me 1 card away from Drag Race (3x Tinkerers, 3VP). I go from 8 to 5 Shinies.

2. Draft GRN-5 from Slot 1 (free + 1 shiny on it). A Prognosticationer rank 5. Decent for sum events but does not align with any current Jumbotron event I can pursue quickly. No synergy with my playbook. The free cost is nice but the card itself is mediocre for my position.

3. Draft ORG-1 from Slot 2 (cost 1 Shiny). A Finders-Keepers rank 1. Low rank is useful for potential Limbo Contest (8VP, 4 cards sum<=8). But I need 3 more low cards for Limbo, which is a long way off.

4. Timeout + flush Soapbox Derby. Earns 1 Shiny and clears a stale 9VP event I cannot pursue. But I am behind Player1 (8VP to my 3VP) and need to build my hand, not take Shinies.

TABLE: Player1 is at 8 Event VP from completing Limbo Contest (8VP)! They have 0 Shinies and only 2 cards. They spent their hand to score big and are now rebuilding. Player3 is at 0VP with 5 Shinies and 5 cards, still building. I am in second place at 3VP but behind Player1 by 5VP. I need to score efficiently to catch up. Player1 being at 2 cards means they need time to rebuild before their next event, giving me a window.

PLAN: Draft RED-10 now to secure my playbook trigger card. My plan over the next 2-3 turns: (a) Draft one more Tinkerer or Free Agent to complete Drag Race (3VP + free Slot 2 draft). Drag Race with YLW-6 (Buddy) + RED-10 (Free Agent as Tinkerer) + one more = done. (b) When completing that event with RED-10, I also trigger The Perfect 10 playbook for 4VP. So one event completion could net me 3VP (event) + 4VP (playbook) = 7VP in one turn, putting me at 10VP total. (c) After that, target higher VP events like Shield Wall or Convoy.

DECISION: Draft RED-10 from Slot 4 for 3 Shinies. This is the single most important card for my game plan. It is a Free Agent (flexible faction), triggers my Perfect 10 playbook (4VP), and at rank 10 contributes massive sum value for events with Sum>=22 requirements. The 3-Shiny cost is easily justified -- this one card unlocks a potential 7VP turn (Drag Race 3VP + Perfect 10 playbook 4VP). No other option comes close in strategic value. I go to 5 Shinies with YLW-6 and RED-10 in hand.

Turn 9 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (2S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S) (1S on card)	Slot 4 (3S)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Drag Race **3 VP** Tier 1
3x Tinkerers
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Recruit Deck: 40 | Event Deck: 31 | The Stands: 13

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 0
Hand: YLW-10 * PUR-2
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **4 VP** Event: 3 | PB: 0 | Shinies: 5
Hand: YLW-6 RED-10 *
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **1 VP** Event: 0 | PB: 0 | Shinies: 5
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=4)
Player2 drafted RED-10 from Lineup Slot 4 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: I am behind in VP (0 vs Player1 at 8, Player2 at 3). I need to start building toward events fast.

1. Draft GRN-5 from Slot 1 (free + collect 2 Shinies). This is incredible value - free card plus 2 Shinies (going from 5 to 7). GRN-5 gives me a second Prognostication (with GRN-3). Two Prognostications + ORG-10 (Free Agent acting as Prognostication) = 3x Prognostications for Guessing Booth (3 VP). But Guessing Booth is not on the Jumbotron right now. However, the value of 2 free Shinies plus a card is extraordinary. Also PUR-5, RED-5, GRN-5 all rank 5 gives me three cards of the same rank - that is a 3-of-a-kind set for Substitution (5 VP, 3 cards same number)! I have three rank-5 cards. Substitution requires 3-of-a-kind and IS a Tier 3 event worth 5 VP. But is it on the Jumbotron? No - current events are Soapbox Derby, Convoy, Drag Race, Shield Wall. But Substitution could appear later.

2. Draft ORG-1 from Slot 2 (costs 1 Shiny). Finders-Keepers rank 1. Low rank useful for sum-constrained events. Adds a second Finders-Keepers card (with ORG-10, but ORG-10 is a Free Agent not a Buddy). Actually ORG-1 is rank 1 which is a signed player - it could be the Buddy for ORG-10. Together they do not make 3x Finders-Keepers alone though.

3. Hire Agent (5 Shinies). Get either Leave It On The Field (4 VP - 2 or fewer cards in hand after completing an event) or The Big Game (4 VP - complete an event worth 9+ VP). Both are strong but spending all 5 Shinies is steep.

TABLE: Player1 is the leader at 8 Event VP (completed Limbo Contest), 0 Shinies, 2 cards. They spent their hand on a big event and are rebuilding. Player2 has 3 VP, 5 Shinies, 2 cards - also rebuilding after their Tug of War. I have the most cards (5) and decent Shinies (5). The Jumbotron shows Convoy (6 VP, 3-card run) and Shield Wall (10 VP, 4x Super-Dupes) as the most interesting targets. I cannot complete Convoy now (need consecutive ranks - my ranks are 3, 5, 5, 9, 10, no 3 consecutive). I cannot complete Shield Wall (need 4x Super-Dupes, I only have RED-5).

PLAN: Drafting GRN-5 for free plus 2 Shinies is the best tempo play. It gives me 6 cards and 7 Shinies - the strongest resource position at the table. With three rank-5 cards (PUR-5, RED-5, GRN-5), I am building toward Substitution (5 VP for 3-of-a-kind) when it appears on the Jumbotron. I also have great faction diversity for Opening Ceremony. The 7 Shinies gives me purchasing power for future turns. My Speed Run playbook triggers on events with 3 or fewer cards, and Substitution uses exactly 3 cards = perfect match.

DECISION: Draft GRN-5 from Slot 1 for free + collect 2 Shinies. The value is undeniable: free card, 2 bonus Shinies, and it gives me a triple-5 set (PUR-5, RED-5, GRN-5) which is the requirement for Substitution (5 VP). No other option comes close in raw value. Going to 7 Shinies also opens up expensive future plays like Hire Agent next turn if needed.

Turn 10 — Player1

4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Recruit Deck: 39 | Event Deck: 31 | The Stands: 13

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 0
Hand: YLW-10 * PUR-2
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **4 VP** Event: 3 | PB: 0 | Shinies: 5
Hand: YLW-6 RED-10 *
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted GRN-5 from Lineup Slot 1 and collected 2 Shinies.

Player1 Thinking:

CANDIDATES: 1. Draft ORG-1 (Slot 1, free, +1 Shiny): Gets me a rank 1 Finders-Keepers plus the 1 Shiny sitting on the card. With ORG-1 (rank 1) + PUR-2 (rank 2), I am 1 card away from a 1-2-3 run for Convoy (6 VP). This is the best available play because it costs nothing, gives me a Shiny, and immediately sets up a path to my next event. 2. Timeout for 1 Shiny: Gains 1 Shiny but no card. With only 2 cards in hand, I need to draft cards more than I need Shinies right now. Building toward Convoy requires cards, not currency. 3. Timeout + flush Soapbox Derby: Clears the 9 VP event, which I cannot complete anyway (I used up most of my Tinkerers on Limbo Contest). This would bring in a new event but I am not interested in helping opponents by refreshing the Jumbotron right now. **TABLE:** I lead with 8 event VP. Player2 has 3 event VP, 5 Shinies, 2 cards. Player3 has 0 event VP, 7 Shinies, 6 cards -- they are building a large hand, probably preparing for a big event. Player3 is the biggest threat long-term because they have the resources to complete high-VP events. Player2 is weakened with only 2 cards. I need to maintain my lead by scoring events faster than opponents can catch up. **PLAN:** Draft ORG-1 this turn. Next turns: draft a rank 3 card (any faction) to complete Convoy (6 VP) with ORG-1 + PUR-2 + rank-3 = run of 1-2-3. That would bring me to 14 event VP (8+6), nearly halfway to the 30 VP threshold. After Convoy, I will still have YLW-10 in hand plus the free Scramble reward from Convoy. I should also be watching for The Rookie playbook opportunities -- if I complete Convoy with ranks 1-2-3, all are ranks 1-5, so The Rookie would trigger for 3 bonus VP\! That would be amazing: 6 VP from Convoy + 3 VP from The Rookie = 9 VP in one turn. **DECISION:** Draft ORG-1 from Slot 1 for free. It is the only card I can afford (0 Shinies), it comes with a bonus Shiny, and it sets up Convoy (6 VP) which I can potentially complete in 2 turns while also triggering The Rookie playbook for an additional 3 VP. Free card + free Shiny + immediate strategic value = obvious choice.

Turn 11 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
BLU-9	BLU-7	YLW-5	PUR-9

JUMBOTRON (AVAILABLE EVENTS)

Soapbox Derby **9 VP** Tier 4
3x Tinkerers + 2 Free Agents. Sum ≥ 22.
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Drag Race **3 VP** Tier 1
3x Tinkerers
Reward: Draft Lineup Slot 2 and take any Shinies on it for free.

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Recruit Deck: 38 | Event Deck: 31 | The Stands: 13

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 1
Hand: YLW-10 * PUR-2 ORG-1
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **4 VP** Event: 3 | PB: 0 | Shinies: 5
Hand: YLW-6 RED-10 *
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted ORG-1 from Lineup Slot 1 and collected 1 Shinies.

Player2 Thinking:

CANDIDATES: The critical options:

1. Draft YLW-5 from Slot 3 (cost 2 Shinies). This gives me the THIRD Tinkerer needed for Drag Race (3VP)! My hand becomes YLW-5, YLW-6, RED-10 -- exactly 3 Tinkerers (YLW-5 + YLW-6 as signed Tinkerers, RED-10 as Free Agent counting as Tinkerer with Buddy System satisfied by the signed players). Next turn I complete Drag Race for 3VP and simultaneously trigger The Perfect 10 playbook for 4VP. Total projected gain: 7VP in one turn.

2. Draft BLU-9 from Slot 1 (free + 1 shiny). A Magician rank 9. High sum value but no immediate event path. I would need 2 more Magicians for any Magician-centric event, and there are no Magician events on the Jumbotron. This delays my Drag Race plan by a turn.

3. Draft BLU-7 from Slot 2 (cost 1 Shiny). Another Magician. Same problem as BLU-9 -- no Magician events available. Does not advance my current strategy.

4. Timeout. Earns 1 Shiny. Terrible when I have a clear 7VP combo to set up. I am already behind Player1 by 5VP and need to score, not accumulate Shinies.

TABLE: Player1 is at 8VP with 1 Shiny and 3 cards, rebuilding. Player3 is at 0VP with 7 Shinies and 6 cards -- they have a large hand but havent scored. Player3 might be building toward a big event. I need to stay ahead of Player3 and catch Player1. My 3VP lead over Player3 is safe for now but Player1 is running away.

PLAN: Turn 11 (now): Draft YLW-5 to complete the Drag Race set. Turn 12-13 (next): Complete Drag Race with YLW-5 + YLW-6 + RED-10 for 3VP event + 4VP playbook = 7VP. This brings me to 10VP total. The Drag Race reward also gives me a free Slot 2 draft, which restocks my hand. After that, I will have 10VP and need to keep building toward the 30VP threshold. I will also flush Soapbox Derby eventually since I cannot build toward it (need 3 Tinkerers + 2 Free Agents with Sum>=22).

DECISION: Draft YLW-5 from Slot 3 for 2 Shinies. This completes my Drag Race trio and sets up the single highest-value play available to me: a 7VP turn (3VP Drag Race + 4VP Perfect 10 playbook). The 2-Shiny cost is well worth the setup. I go to 3 Shinies with 3 cards in hand (YLW-5, YLW-6, RED-10). Next turn I fire the combo.

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 1
Hand: YLW-10 * PUR-2 ORG-1
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **4 VP** Event: 3 | PB: 0 | Shinies: 3
Hand: YLW-6 RED-10 * YLW-5
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=3)
Player2 drafted YLW-5 from Lineup Slot 3 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: I am at 0 Event VP while Player1 has 8 and Player2 has 3. I need to score soon.

1. Draft BLU-9 from Slot 1 (free + collect 2 Shinies). Gets me to 9 Shinies and 7 cards. BLU-9 adds another faction (Blue Magicians) giving me 6 different factions in hand! That is enough for Opening Ceremony (4 different factions, 7 VP) when it appears. Also BLU-9 rank 9 pairs with YLW-9 (both rank 9) for possible pair/set events. BLU-9 + YLW-9 + PUR-5 = if I had a rank 8 card I could do a run 8-9-10 with ORG-10. The 2 Shinies bonus is significant.

2. Draft PUR-8 from Slot 4 (costs 3 Shinies). This is the key piece I need. With PUR-8 (rank 8), YLW-9 (rank 9), ORG-10 (rank 10), I have a perfect 8-9-10 run for Convoy (6 VP) which also triggers The Speed Run playbook (3 VP). Total = 9 VP in one shot. But this costs 3 Shinies (going from 7 to 4) and I still need to wait for Convoy to be available.

3. Draft PUR-9 from Slot 3 (costs 2 Shinies). Another rank-9 card. Gives me three rank-9s (PUR-9, YLW-9, BLU-9 if I also draft that). Three-of-a-kind for Substitution. But again, Substitution is not on the Jumbotron.

TABLE: Player1 at 8 Event VP, 1 Shiny, 3 cards - in a strong position but low on resources. Player2 at 3 VP, 3 Shinies, 3 cards. The Jumbotron has Convoy (6 VP, 3-card run) which I can complete if I get an 8 to pair with my 9 and 10. Currently PUR-8 is in Slot 4. If I draft something else, PUR-8 slides to Slot 3 next time a card leaves. But Player1 or Player2 might take it first - it is a strong card for runs.

PLAN: The dilemma is: draft BLU-9 now for free + 2 Shinies (safe value play), or draft PUR-8 for 3 Shinies (aggressive play toward Convoy). If I take BLU-9 now, PUR-8 slides to Slot 3 (cost 2), then potentially to Slot 2 (cost 1) or Slot 1 (free) - but opponents may draft it. If I take PUR-8 now for 3 Shinies, I could potentially complete Convoy NEXT turn for 6+3=9 VP. But can I complete Convoy next turn? I need it to still be on the Jumbotron. It is currently in Slot 2. Nobody seems to be targeting it (needs a 3-card run). It should survive one more round.

However, BLU-9 free + 2 Shinies is such insane value I cannot pass it up. Going to 9 Shinies. Then next turn I can still try to get a rank-8 card. With 9 Shinies I can afford anything. And BLU-9 itself at rank 9 could be part of a future run (7-8-9 if I find a 7 and 8). I already have YLW-9 as my run piece. Actually, I realize: I have YLW-9 (9) and ORG-10 (10). For an 8-9-10 run I need ANY rank-8 card. There might be other rank-8 cards in the deck. Taking BLU-9 for free and waiting for a cheaper rank-8 is the smart play.

DECISION: Draft BLU-9 from Slot 1 for free + 2 Shinies. Going from 7 to 9 Shinies gives me massive purchasing power. I will have 7 cards with 6 different factions, three rank-9s, and a Free Agent. Next turn I can pursue the rank-8 for Convoy. With 9 Shinies I can afford any Slot 4 card (3 Shinies) and still have 6 left. The PUR-8 sliding to Slot 3 (cost 2) or cheaper makes it even better to wait.

Recruit Deck: 36 | Event Deck: 31 | The Stands: 13

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 1
Hand: YLW-10 * PUR-2 ORG-1
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **4 VP** Event: 3 | PB: 0 | Shinies: 3
Hand: YLW-6 RED-10 * YLW-5
Events: Tug of War (3VP)
Playbooks: The Perfect 10 (4VP)

Player3 **3 VP** Event: 0 | PB: 0 | Shinies: 9
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted BLU-9 from Lineup Slot 1 and collected 2 Shinies.

Player1 Thinking:
CANDIDATES: 1. Draft BLU-7 (Slot 1, free, +1 Shiny on card): Gets me a rank 7 Magicians card with 1 bonus Shiny. This opens up 7-8-9 or 8-9-10 run possibilities if I can draft the right cards next. BLU-7 also helps with sum-based events (rank 7 contributes significantly to Sum>=12 or Sum>=22 requirements). Free draft means I keep my 1 Shiny. 2. Draft PUR-9 (Slot 2, cost 1 Shiny): Rank 9 Time Travelers. Combined with PUR-2 (rank 2) I would have two Time Travelers but they are too far apart in rank for a run. PUR-9 could form an 8-9-10 run with YLW-10 (rank 10) if I find a rank 8 later. But spending my last Shiny feels risky. 3. Timeout for 1 Shiny: Conservative. Gets me to 2 Shinies. But with only 3 cards in hand, I need more cards, not more Shinies right now. Without drafting, I fall behind in event completion capability. **TABLE:** I lead with 8 event VP. Player2 has 3 event VP, 3 Shinies, 3 cards. Player3 has 0 event VP but 9 Shinies and 7 cards -- they are clearly building toward a massive event completion. Player3 is my biggest worry. With 7 cards and 9 Shinies, they could have the pieces for a high-tier event that would vault them into contention. I need to keep scoring before Player3 makes their move. **PLAN:** Draft BLU-7 now (free). Then I will have YLW-10 (10), PUR-2 (2), ORG-1 (1), BLU-7 (7). Multiple run possibilities open up: if I draft a rank 8, I get 7-8-9 or 8-9-10 runs. If I draft a rank 3, I get 1-2-3 run. The 1-2-3 run with ORG-1 + PUR-2 + rank-3 is still my preferred Convoy target because all cards are ranks 1-5, triggering The Rookie playbook for 3 bonus VP. **DECISION:** Draft BLU-7 from Slot 1 for free. Free cards are always good tempo. BLU-7 adds run potential (7-8-9 or 8-9-10), sum contribution for high-tier events, and I collect the 1 Shiny bonus sitting on it. I keep my existing 1 Shiny for future flexibility. Building hand size is critical right now since I depleted my hand completing Limbo Contest.

Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted BLU-7 from Lineup Slot 1 and collected 1 Shinies.

Player2 Thinking:

CANDIDATES: There is really only one serious option this turn:

1. Complete Drag Race (3VP) with YLW-6 + RED-10 (Free Agent as Tinkerer) + YLW-5. This is the combo I have been building for 3 turns. The reward is drafting Lineup Slot 2 (PUR-8, Time Travelers rank 8) for free. Crucially, using RED-10 (rank 10) in this event triggers my The Perfect 10 playbook for 4VP at end-of-turn. Total value: 3VP (event) + 4VP (playbook) + free PUR-8 draft = 7VP net from one turn. This is an enormous swing.

2. Draft GRN-0 from Slot 3 (cost 2 Shinies). A Prognostications Free Agent (rank 0). Useful for future events but delays my Drag Race completion by at least one more turn. Every turn of delay is a turn Player1 or Player3 might score.

3. Draft PUR-9 from Slot 1 (free). A Time Traveler rank 9. Free is always tempting but I have the Drag Race combo ready NOW. Delaying is strictly worse.

TABLE: Player1 is at 8VP with 2 Shinies and 4 cards, steadily rebuilding. Player3 is at 0VP event but has 9 Shinies and 7 cards -- they are stockpiling heavily and likely preparing a big multi-card event. Player3 having 3 total score suggests they scored a 3VP playbook or have shiny bonus. Wait, total=3 with events=0 -- so Player3 must have scored a playbook for 3VP or have shiny bonus. With 9 Shinies that is 3 shiny bonus VP (floor(9/3)=3, max 3). But shiny bonus is only at final tally... let me re-check. Actually the score display says total=3 with events=0 and playbooks=0. Maybe they scored a playbook worth 3? No, playbooks=0. Hmm, perhaps the total includes projected shiny bonus? Either way, Player3 is not an immediate VP threat since they have 0 event VP and cannot trigger endgame.

PLAN: Complete Drag Race now for the 7VP swing (3VP event + 4VP playbook). This brings me to 6 Event VP + 4 Playbook VP = 10VP total. I receive PUR-8 for free from the reward. My hand will be just PUR-8 + whatever hand position I have after scoring the playbook. I then need to draft aggressively to build toward the next event. With PUR-8 (Time Traveler) I can start building toward Time Traveler events or mixed events. I have 3 Shinies for drafting. Long-term goal: reach 30 Event VP. I need 24 more Event VP from events after this turn.

DECISION: Complete Drag Race with YLW-6, RED-10, YLW-5. This is the culmination of my multi-turn strategy. 7VP in one turn (3VP event + 4VP playbook) is the highest-value play I can possibly make. The reward (free PUR-8 draft) restocks my hand. Delaying this combo serves no purpose and risks the Jumbotron changing. Execute now.

Player2 `complete_event` (eventSlot=3, cardIds=['tinkerers_6', 'super_dupes_10', 'tinkerers_5'])

Player2 completed Drag Race [3 VP] with YLW-6, RED-10, YLW-5; reward: free-drafted Slot 2 (PUR-8).

Player2 Thinking:

Score The Perfect 10 for 4VP. I just completed Drag Race using RED-10 (Rank 10 card), which satisfies the playbook condition. This brings my total to 6 Event VP + 4 Playbook VP = 10VP total. No reason to skip this.

Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9
Playbooks: The Speed Run (3VP)

Player2 `score_playbook` (playbookIndex=0)
Player2 scored Playbook The Perfect 10.

Player3 Thinking:

CANDIDATES: I am at 0 Event VP, Player1 at 8, Player2 at 6. I have 7 cards and 9 Shinies but no events I can complete on the current Jumbotron. Let me evaluate:

1. Timeout + flush Soapbox Derby. Gain 1 Shiny (go to 10) and replace the Soapbox Derby with a new event from the deck. Soapbox Derby requires 3x Tinkerers + 2 Free Agents - I only have 1 Tinkerer so this event is useless to me. Flushing it could bring in an event I CAN complete. I have three rank-5s (PUR-5, RED-5, GRN-5) for Substitution or Photo Finish, 6 different factions for Opening Ceremony, and two rank-9s for pair events. Any of these appearing on the Jumbotron would let me score next turn.

2. Draft PUR-9 from Slot 1 (free). Another rank 9 gives me three rank-9s (PUR-9, YLW-9, BLU-9) for Substitution (3-of-a-kind, 5 VP). But I already have three rank-5s for the same event. And Substitution is not on the Jumbotron. Getting an 8th card without scoring puts me dangerously close to the 8-card hand limit (including playbook).

3. Draft GRN-0 from Slot 2 (1 Shiny). A Free Agent. Useful as flexible glue but I do not have a specific event to complete with it right now.

TABLE: Player2 has jumped to 11 total VP (6 Events + 4 Playbook) and is the most dangerous. Player1 is at 8 Event VP. Both are rebuilding with small hands (1 and 4 cards). The Jumbotron events are Soapbox Derby (hard for anyone), Convoy (needs a run - possible if someone has consecutive ranks), Shield Wall (10 VP, needs 4x Super-Dupes - very hard), Halftime Show (11 VP, 4x Magicians). None of these are easy to complete. Flushing Soapbox Derby could bring in something much more accessible.

PLAN: Flush Soapbox Derby to cycle the Jumbotron. A new Tier 1-3 event is much more likely to be completable with my diverse hand. I have the raw cards for Photo Finish (three 5s sum exactly 15), Substitution (three 5s or three 9s as 3-of-a-kind), Opening Ceremony (4 different factions), and many Tier 1 events (3x same faction using Free Agent). Going to 10 Shinies also gives me massive purchasing power for a clutch draft if needed. Not discarding any cards - I want to keep my options open.

DECISION: Timeout with flush Jumbotron Slot 1. This is the right play because (a) Soapbox Derby is dead weight for me and likely for others too, (b) gaining a Shiny maintains my economic advantage at 10 Shinies, (c) the new event could be one I can immediately complete next turn. The Jumbotron needs fresh blood. I am not discarding any hand cards because all of them could be useful for various events.

Turn 16 — Player1

Phase: main

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 3
Hand: PUR-8
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **3 VP** Event: 0 | PB: 0 | Shinies: 10
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9
Playbooks: The Speed Run (3VP)

Player3 `timeout` (discardHandIndices=[], flushEvent=True)
Player3 called Timeout and gained 1 Shiny; cycled Soapbox Derby off Jumbotron Slot 1.

Player1 Thinking:

CANDIDATES: 1. Draft GRN-0 (Slot 2, 1 Shiny): This is a Free Agent (rank 0, Prognostications) that completes my 0-1-2 run for Convoy. With GRN-0 (0) + ORG-1 (1) + PUR-2 (2), I can complete Convoy next turn for 6 VP. The reward is a free Scramble, which gives me board position and a mystery card. This puts me at 14 event VP, extending my lead significantly. 2. Draft PUR-9 (Slot 1, free): Free Time Travelers rank 9. Could form a 7-8-9 or 8-9-10 run but I would need to find a rank 8, which is uncertain. PUR-9 is free which is attractive, but it does not immediately enable an event completion. 3. Draft GRN-10 (Slot 3, 2 Shinies): Another Free Agent but rank 10. Costs 2 Shinies (all I have). Does not enable a run. Would give me 3 Free Agents which is nice for flexibility but does not lead to immediate VP. **TABLE:** Player2 has surged to 11 total VP (6 events + 4 playbook). They scored a Playbook and another event while I was rebuilding. Player2 only has 1 card in hand, so they are stretched thin. Player3 has 0 event VP but 10 Shinies and 7 cards -- a massive stockpile. Player3 is still preparing for a big play. I need to score Convoy to maintain my lead. The Jumbotron now shows New Rules (15 VP\!) which needs 4 cards of the same number -- extremely hard but game-changing if someone pulls it off. **PLAN:** Draft GRN-0 this turn for 1 Shiny. Next turn, complete Convoy with GRN-0 + ORG-1 + PUR-2 (0-1-2 run) for 6 VP. After Convoy, I will have YLW-10 and BLU-7 remaining plus a free Scramble reward (gives me a mystery card). Total event VP would be 14. Then I need to continue building toward 30 VP. Keeping YLW-10 (Free Agent rank 10) and BLU-7 (rank 7) gives me strong sum potential for future events. The Rookie playbook will not trigger on this Convoy (rank 0 is outside 1-5 range), so I will look for future events using only ranks 1-5. **DECISION:** Draft GRN-0 from Slot 2 for 1 Shiny. This directly enables Convoy completion next turn for 6 VP. Spending 1 Shiny to set up a 6 VP event is outstanding value. The 0-1-2 run is certain and complete with this card. No other option provides this level of immediate strategic advantage.

Turn 17 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Player3 **3 VP** Event: 0 | PB: 0 | Shinies: 10
Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=2)
Player1 drafted GRN-0 from Lineup Slot 2 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: Evaluating my options with only PUR-8 in hand and 3 Shinies:

1. Draft PUR-9 from Slot 1 (FREE + 1 shiny on it). This gives me PUR-8 + PUR-9, two consecutive-rank Time Travelers (8 and 9). I need just one more card to form a 3-card run for Convoy (6VP). Specifically, I need a rank 7 (for 7-8-9) or a rank 10 (for 8-9-10). Rank 10 cards are Free Agents so any rank 10 would work. Net gain: +1 card, +1 shiny, strong Convoy setup.

2. Draft GRN-10 from Slot 2 (cost 1 Shiny). A Prognostications Free Agent rank 10. This is a Free Agent but I do not have a clear 3-card run setup with it. PUR-8 + GRN-10 is ranks 8 and 10 -- I would need a rank 9 to complete a run. I already have the PUR-9 available for free in Slot 1, but if I take GRN-10 first, PUR-9 might get drafted by someone else. Also costs 1 Shiny.

3. Draft BLU-1 from Slot 3 (cost 2 Shinies). A Magician rank 1. Low rank, useful for Limbo-type events. But those are not on the Jumbotron right now and I am not building toward Magician events.

4. Timeout. Earn 1 Shiny and optionally flush Convoy. But I need cards more than Shinies, and Convoy is an event I might actually want to complete.

TABLE: Player1 at 8VP with 5 cards is rebuilding toward their next event. Player3 at 0 Event VP with 10 Shinies and 7 cards is sitting on a massive stockpile -- they are likely preparing for a big play (maybe New Rules at 15VP if they can get 4 of the same rank, or another high-tier event). I need to stay ahead of both by continuing to score. I am at 11VP total but only 6 Event VP. I need 24 more Event VP to trigger endgame.

PLAN: Draft PUR-9 now (free + shiny). Next I need a rank 7 or rank 10 card to complete Convoy (6VP, 3-card run with 7-8-9 or 8-9-10). PUR-9 at rank 9 combined with PUR-8 at rank 8 is a strong partial run. After Convoy I would be at 12 Event VP. From there, I target higher-VP events. The Jumbotron has Shield Wall (10VP) and Halftime Show (11VP) and New Rules (15VP) as long-term options.

DECISION: Draft PUR-9 from Slot 1 for free, collecting the 1 shiny on it. Zero cost, +1 card, +1 shiny. Creates PUR-8 + PUR-9 in hand, just 1 card away from a Convoy run (6VP). The free draft is the best tempo play available. I go to 4 Shinies with 2 cards in hand.

Turn 18 — Player3

Hand: PUR-5 YLW-9 ORG-10 * GRN-3 RED-5 GRN-5 BLU-9 ORG-8
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted PUR-9 from Lineup Slot 1 and collected 1 Shinies.

Player3 Thinking:

CANDIDATES: Three main options:

1. Draft ORG-8 from Slot 4 (3 Shinies). This is THE missing piece for Convoy (6 VP). ORG-8 (rank 8) + YLW-9 (rank 9) + ORG-10 (rank 10) = 8-9-10, a valid 3-card run. Convoy is on the Jumbotron at Slot 1. Next turn I complete Convoy for 6 VP, PLUS my Speed Run playbook triggers (3 or fewer cards) for another 3 VP = 9 VP in one shot. Cost: 3 Shinies (going from 10 to 7). I will hit hand limit (8 cards + 1 playbook = 9 > 8) so I will need to discard 1 card.

2. Draft GRN-10 from Slot 1 (free). Another Free Agent. Gives me 2 Free Agents (ORG-10 + GRN-10). Good for events requiring Free Agents. But it does not complete any immediate event path. And it pushes me to hand limit.

3. Timeout + flush Convoy. Bring in a new event. But Convoy is exactly what I am about to complete! Flushing it would be terrible.

TABLE: Player2 leads at 11 total VP (6 Event + 4 Playbook). Player1 has 8 Event VP. I am at 0 Event VP with 10 Shinies. I am severely behind on VP but have the most resources (10 Shinies) and most cards (7). This is my pivot moment - I must start scoring or the game will end before I get enough VP. Player1 could be close to completing another big event with 5 cards.

PLAN: This is the critical two-turn plan: Turn 18 draft ORG-8 (complete the 8-9-10 run setup), Turn 19 complete Convoy (6 VP + 3 VP playbook = 9 VP). After that I will have 4 cards left in hand (7 + 1 drafted - 3 used - 1 discarded at hand limit = 4) and 7 Shinies. That puts me at 9 VP from 0, a massive swing. Then I continue building from there.

The discard choice: I need to discard 1 card after drafting. My cards will be PUR-5, YLW-9, ORG-10, GRN-3, RED-5, GRN-5, BLU-9, ORG-8. For Convoy I need ORG-8, YLW-9, ORG-10 (the 8-9-10 run). My remaining cards after Convoy completion will be PUR-5, GRN-3, RED-5, GRN-5, BLU-9. I should discard GRN-3 (rank 3, least useful for future events since I already have 5-faction diversity without it). Actually, I should keep GRN-3 for future Limbo/low-sum events. Let me discard PUR-5 instead - with ORG-8 being also Finders-Keepers, I have good faction coverage without the extra Time Traveler. Either way, I will see the hand limit action.

DECISION: Draft ORG-8 from Slot 4 for 3 Shinies. This directly enables Convoy completion next turn for a 9 VP swing (6 VP event + 3 VP playbook). No other option provides this kind of VP acceleration. The 3 Shiny cost is easily justified by the 9 VP payoff.

Player3 `recruit_lineup` (slot=4)

Player3 drafted ORG-8 from Lineup Slot 4 and collected 0 Shinies.

Player3 Thinking:

Discarding GRN-3 (rank 3, Prognostications). This is the least useful card in my hand. I need ORG-8, YLW-9/BLU-9, ORG-10 for the 8-9-10 Convoy run. I need PUR-5, RED-5, GRN-5 (three rank-5s) for future Substitution/Photo Finish events. Between GRN-3 and the second rank-9 (BLU-9), GRN-3 is weaker because rank 3 only helps low-sum events, while BLU-9 gives me flexibility for Magician events and a backup rank-9 for Convoy.

Turn 19 — Player1

Phase: main

JUMBOTRON (AVAILABLE EVENTS)

Convoy **6 VP** Tier 3
3-card Run (consecutive ranks. 0-1-2 and 8-9-10 valid)
Reward: Perform one free Scramble.

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Halftime Show **11 VP** Tier 5
4x Magicians. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose one opponent: Look at 1 Playbook in their hand. Return it. (If no Playbooks: look at their entire hand.)

New Rules! **15 VP** Tier 6
4 cards with the same number (any factions)
Reward: Discard all Lineup/Jumbotron cards to bottom of their decks and refill. All Shinies from discarded Lineup cards go to new recruit in Slot 4.

Recruit Deck: 31 | Event Deck: 30 | The Stands: 17

SCOREBOARD

Player1 **8 VP** Event: 8 | PB: 0 | Shinies: 1
Hand: YLW-10 * PUR-2 ORG-1 BLU-7 GRN-0 *
Events: Limbo Contest (8VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 4
Hand: PUR-8 PUR-9
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-8
Playbooks: The Speed Run (3VP)

Player3 `discard_for_hand_limit` (handIndex=3)
Player3 discarded to the hand limit.

Player1 Thinking:

CANDIDATES: 1. Complete Convoy (6 VP): Use GRN-0 (0) + ORG-1 (1) + PUR-2 (2) as a 0-1-2 run. This scores 6 VP immediately and gives me a free Scramble as reward. After completion I keep YLW-10 and BLU-7 in hand, plus get a mystery card from the Scramble. This brings my event VP to 14, overtaking Player2 significantly. 2. Draft GRN-10 (Slot 1, free): Another Free Agent would be nice but does not immediately score VP. I am behind Player2 on total points and need to close the gap. Drafting delays scoring by at least 2 more turns. 3. Timeout: Gains 1 Shiny, no VP. Wasteful when I can score 6 VP right now. **TABLE:** Player2 leads with 11 total VP (6 events + 4 playbook + 1 Shiny bonus). I am at 8 total VP with 8 events. Player3 has 0 event VP but 7 Shinies and 7 cards - they are the dark horse. Completing Convoy puts me at 14 event VP, making me the clear leader. Player2 has only 2 cards so they will need multiple turns to set up their next event. This is my window to build a commanding lead. **PLAN:** Complete Convoy now for 6 VP. The free Scramble reward discards Lineup Slot 1 and gives me a mystery recruit. After this, I have YLW-10 (rank 10 Free Agent) and BLU-7 (rank 7 Magicians) plus whatever I draw from the Scramble. With 14 event VP, I am nearly halfway to the 30 VP threshold. My next goal: look for tier 3-5 events I can build toward. Halftime Show needs 4 Magicians with Sum>=22 -- I have BLU-7 as a start. Shield Wall needs 4 Super-Dupes which I have none of. New Rules needs 4 same-number cards which is very hard. I will likely need to build toward new events that enter the Jumbotron. Note: The Rookie playbook cannot trigger here because GRN-0 is rank 0, not within ranks 1-5. I will save The Rookie for a future event using only mid-rank cards. **DECISION:** Complete Convoy with GRN-0 + ORG-1 + PUR-2 (0-1-2 run) for 6 VP. This is the obvious play: 6 VP immediately, free Scramble reward, and keeps my two best cards (YLW-10 and BLU-7) in hand. Scoring now is imperative because Player2 is at 11 total VP and closing in. Every turn I delay scoring is a turn they could score another event or playbook.

Turn 20 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S) (1S on card)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-8
Playbooks: The Speed Run (3VP)

Player1 `complete_event` (eventSlot=1, cardIds=['time_travelers_2', 'finders_keepers_1', 'prognosticationers_0'])
Player1 completed Convoy [6 VP] with PUR-2, ORG-1, GRN-0; reward: Player1 performed a free Scramble and drew 1 mystery card. 1 Shinies moved onto the new Slot 4..

Player2 Thinking:

CANDIDATES: With PUR-8 and PUR-9 in hand and the Jumbotron showing only demanding high-VP events, I need to rebuild my hand flexibly:

1. Draft BLU-1 from Slot 1 (FREE + 1 shiny). A Magician rank 1. Free economy plus a low-rank card. Gives me 3 different faction presences (Time Travelers, Magicians) and a rank 1. This could contribute to Sudden Death (12VP, 3 factions Sum=11) if I can assemble the right combination. For example: BLU-1 (rank 1) + PUR-8 (rank 8) + some rank 2 from a third faction = sum 11 from 3 factions. Or BLU-1 + PUR-9 + some rank 1 from a third faction = sum 11. Low-rank cards are also valuable for future Limbo-type events.

2. Draft GRN-6 from Slot 2 (cost 1 Shiny + 1 from card). A Prognostictioner rank 6. Medium value. Does not help with Sudden Death math (PUR-8 + GRN-6 = 14, too high for sum 11 with 3 cards). Costs a Shiny.

3. Draft ORG-6 from Slot 3 (cost 2 Shinies). A Finders-Keepers rank 6. Same problem as GRN-6 -- too high for Sudden Death. Expensive.

4. Timeout. Earn 1 Shiny and optionally flush Shield Wall. Not productive when a free draft is available. However, flushing Shield Wall could bring in a more achievable event.

TABLE: Player1 has rocketed to 14VP event (completed Convoy for 6VP on top of Limbo 8VP). They have only 3 cards and 1 Shiny, so they are somewhat depleted after consecutive scores. Player3 is still at 0 Event VP with 7 Shinies and 7 cards -- they seem stuck or waiting for the right moment. I am at 6 Event VP + 4 Playbook VP = 10VP. Player1 has 14VP total and leads. I need to score faster.

PLAN: Draft BLU-1 for free now. My immediate focus is finding a path to Sudden Death (12VP, 3 factions Sum=11). With BLU-1 (rank 1) + PUR-8 (rank 8) I need a rank 2 from any non-Magician, non-Time-Traveler faction. Or BLU-1 + another rank 1 from a third faction + PUR-9 = sum 11. I will also keep an eye on the Jumbotron as it rotates -- Tier 1-3 events may appear that I can complete more easily.

DECISION: Draft BLU-1 from Slot 1 for free + collect 1 shiny. Zero cost, +1 card, +1 shiny. This is the highest-efficiency play available. BLU-1 at rank 1 opens Sudden Death possibilities and provides faction diversity. I go to 5 Shinies with 3 cards in hand (PUR-8, PUR-9, BLU-1).

Turn 21 — Player3

Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 5
Hand: PUR-8 PUR-9 BLU-1
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 7
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-8 ORG-5
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted BLU-1 from Lineup Slot 1 and collected 1 Shinies.

Player3 Thinking:

CANDIDATES: This is the most important decision of the game for me.

1. Draft ORG-5 from Slot 3 (2 Shinies, collect 1 Shiny on card = net cost 1). This gives me the 4th rank-5 card: PUR-5, RED-5, GRN-5, ORG-5. Four cards with the same number = New Rules! (15 VP). New Rules is on the Jumbotron at Slot 3. I draft now, complete next turn for 15 VP. This would catapult me from 0 Event VP to 15 Event VP in a single move, nearly reaching the halfway point to victory. The Speed Run playbook does NOT trigger (4 cards, not 3), but 15 VP is extraordinary.

2. Draft GRN-6 from Slot 1 (free + 1 Shiny). A decent value pickup but does not enable any immediate event completion. GRN-6 rank 6 does not match my rank-5 or rank-9 sets.

3. Timeout + flush Shield Wall. Brings in a new event, but New Rules! is already on the Jumbotron and I am one card away from completing it. Flushing Shield Wall does not help me.

TABLE: Player1 leads at 14 Event VP, Player2 at 6 Event VP (11 total with playbook). I am at 0 Event VP. Player1 at 14 VP is dangerously close to the 30 VP threshold - they need 16 more. If Player1 completes New Rules! (15 VP) they would be at 29 VP. I MUST not let them get it, and I MUST get it myself. Neither Player1 nor Player2 seems positioned for New Rules! (it requires 4 cards of the same number, which is very hard to assemble). With ORG-5, I will be the only player who can complete it.

PLAN: Two-turn plan: Turn 21 draft ORG-5 (complete the quad-5 set), then Turn 22 (or whenever my next turn comes) complete New Rules! for 15 VP. After New Rules!, its reward also resets the entire Lineup and Jumbotron which gives me fresh opportunities. I will need to discard 1 card for hand limit (probably ORG-8 since Convoy is gone and 8 is no longer useful for any event). After completing New Rules! I will have spent 4 cards (the four 5s) leaving me with ORG-10, YLW-9, BLU-9, and the playbook. That is a strong remainder for future events.

DECISION: Draft ORG-5 from Slot 3 for 2 Shinies (net cost 1 with the Shiny on card). This is the single best play available in the entire game. 15 VP from one event is more than all of Player2 combined Event VP. The risk of someone else taking ORG-5 before me is real - it is a rank 5 which is versatile. I must take it now.

Player3 `recruit_lineup` (slot=3)

Player3 drafted ORG-5 from Lineup Slot 3 and collected 1 Shinies.

Player3 Thinking:

Discarding ORG-8 (Finders-Keepers rank 8). Convoy is gone from the Jumbotron so the 8-9-10 run is no longer viable. I must keep all four rank-5 cards (PUR-5, RED-5, GRN-5, ORG-5) for New Rules\! (15 VP). I keep ORG-10 (Free Agent, extremely flexible), YLW-9 and BLU-9 (high-rank cards for future events after New Rules\! resets the board). ORG-8 is the weakest remaining card with no specific event target.

Turn 22 — Player1

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (2S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S)
GRN-6	ORG-6	RED-7	BLU-2

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Halftime Show **11 VP** Tier 5
4x Magicians. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose one opponent: Look at 1 Playbook in their hand. Return it. (If no Playbooks: look at their entire hand.)

New Rules! **15 VP** Tier 6
4 cards with the same number (any factions)
Reward: Discard all Lineup/Jumbotron cards to bottom of their decks and refill. All Shinies from discarded Lineup cards go to new recruit in Slot 4.

Sudden Death **12 VP** Tier 6
3 cards from 3 different factions. Sum exactly 11.
Reward: If any opponent has more VP than you: choose one of them; they discard 2 cards from their hand to The Stands. Otherwise: take 2 Shinies from the Bank.

Recruit Deck: 27 | Event Deck: 29 | The Stands: 22

SCOREBOARD

Player1 **14 VP** Event: 14 | PB: 0 | Shinies: 1
Hand: YLW-10 * BLU-7 YLW-2
Events: Limbo Contest (8VP), Convoy (6VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 5
Hand: PUR-8 PUR-9 BLU-1
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 6
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-5
Playbooks: The Speed Run (3VP)

Player3 `discard_for_hand_limit` (handIndex=6)
Player3 discarded to the hand limit.

Player1 Thinking:

CANDIDATES: 1. Draft GRN-6 (Slot 1, free, +2 Shinies): Free card with 2 bonus Shinies is outstanding value. GRN-6 (Prognosticationers rank 6) adds a third faction to my hand and its mid-high rank helps with sum requirements. After drafting, I will have 3 Shinies, 4 cards, and 3 different factions (Tinkerers, Magicians, Prognosticationers). 2. Draft ORG-6 (Slot 2, 1 Shiny, +1 Shiny): Finders-Keepers rank 6, net cost 0 Shinies. Also adds a faction but costs 1 Shiny while giving 1 back. GRN-6 is strictly better because it gives 2 bonus Shinies. 3. Timeout for 1 Shiny: Only 1 Shiny gain and no card. GRN-6 gives 2 Shinies AND a card. Clearly inferior. **TABLE:** I lead with 14 event VP. Player2 has 11 total (6 events + 4 playbook + 1 Shiny bonus). Player3 is at 0 event VP with 6 Shinies and 7 cards -- still building. The high-VP events on the Jumbotron (Sudden Death 12, New Rules 15, Halftime Show 11) could let anyone make a massive jump. Player3 with their 7-card hand is best positioned for these. I need to keep drafting and scoring to stay ahead. **PLAN:** Draft GRN-6 this turn. My hand becomes: YLW-10 (10), BLU-7 (7), YLW-2 (2), GRN-6 (6). For Sudden Death (3 factions, sum exactly 11): I would need YLW-2 (2) + BLU-7 (7) + rank-2 from a new faction = sum 11. Or YLW-2 (2) + GRN-6 (6) + rank-3 from another faction = 11. These are achievable with one more draft. Alternatively, BLU-2 is in Slot 4 (costs 3 Shinies though). If BLU-2 slides left next turn, I could draft it and then: YLW-2 (2, Tinkerer) + BLU-7 (7, Magician) + GRN-something? No, BLU-2 and BLU-7 are both Magicians. Need 3 different factions. Let me focus on building options. 2+7+2=11 with YLW-2 (Tinkerer) + BLU-7 (Magician) + any rank-2 from a non-Tinkerer, non-Magician faction. Or GRN-6 (6, Prognost.) + YLW-2 (2, Tinkerer) + rank-3 Magician or other = 11. **DECISION:** Draft GRN-6 from Slot 1 for free. The math is simple: free card + 2 bonus Shinies is the best possible tempo play available. It adds faction diversity and rank versatility. With 3 Shinies and 4 cards after this draft, I have more flexibility for future moves.

Turn 23 — Player2

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)
ORG-6	RED-7	BLU-2	ORG-2

JUMBOTRON (AVAILABLE EVENTS)

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Halftime Show **11 VP** Tier 5
4x Magicians. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose one opponent: Look at 1 Playbook in their hand. Return it. (If no Playbooks: look at their entire hand.)

New Rules! **15 VP** Tier 6
4 cards with the same number (any factions)
Reward: Discard all Lineup/Jumbotron cards to bottom of their decks and refill. All Shinies from discarded Lineup cards go to new recruit in Slot 4.

Sudden Death **12 VP** Tier 6
3 cards from 3 different factions. Sum exactly 11.
Reward: If any opponent has more VP than you: choose one of them; they discard 2 cards from their hand to The Stands. Otherwise: take 2 Shinies from the Bank.

Recruit Deck: 26 | Event Deck: 29 | The Stands: 22

SCOREBOARD

Player1 **15 VP** Event: 14 | PB: 0 | Shinies: 3
Hand: YLW-10 * BLU-7 YLW-2 GRN-6
Events: Limbo Contest (8VP), Convoy (6VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 5
Hand: PUR-8 PUR-9 BLU-1
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 6
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-5
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted GRN-6 from Lineup Slot 1 and collected 2 Shinies.

Player2 Thinking:

CANDIDATES: This is a pivotal turn with a clear best play:

1. Draft ORG-2 from Slot 4 (cost 3 Shinies). This gives me the exact third card needed for Sudden Death (12VP). My hand would be: BLU-1 (Magician, rank 1) + PUR-8 (Time Traveler, rank 8) + ORG-2 (Finders-Keepers, rank 2) = Sum 11, 3 different factions. Sudden Death is the highest-VP event on the Jumbotron that I can realistically complete (12VP!). The reward is even better: since Player1 has more VP than me (15 vs 11), I choose Player1 and they must discard 2 cards from their hand. This scores me 12VP AND disrupts the leader. I go from 5 to 2 Shinies.

2. Draft ORG-6 from Slot 1 (free + 1 shiny). A Finders-Keepers rank 6. Free is nice but rank 6 does not help with Sudden Death (BLU-1 + PUR-8 + ORG-6 = sum 15, not 11). This would delay my Sudden Death by at least a turn while I look for a rank 2 Finders-Keepers elsewhere. Every turn of delay is a turn Player1 might score again.

3. Draft BLU-2 from Slot 3 (cost 2 Shinies). A Magician rank 2. Same faction as BLU-1, so BLU-2 + BLU-1 would be two Magicians -- I need 3 DIFFERENT factions for Sudden Death, not 2 Magicians. BLU-2 does not work for my Sudden Death plan. Would need to replace BLU-1, using BLU-2 + PUR-8 + some rank 1 from a third faction = sum 11. But that is more uncertain.

4. Draft RED-7 from Slot 2 (cost 1 Shiny). A Super-Dupes rank 7. RED-7 + PUR-8 + BLU-1 = sum 16, not 11. Does not enable Sudden Death. Could start building toward other events but nothing immediate.

TABLE: Player1 at 15VP total (14 Event + 1 shiny bonus) is in a commanding lead. They have 3 Shinies and 4 cards, likely rebuilding for another push. Player3 at 0 Event VP with 6 Shinies and 7 cards has been stockpiling without scoring -- they may be building toward New Rules (15VP, 4 cards same number) given their large hand. I am at 11VP total and need a big score to compete with Player1.

PLAN: Turn 23 (now): Draft ORG-2 for 3 Shinies. Turn 24-25 (next): Complete Sudden Death with BLU-1 + PUR-8 + ORG-2 for 12VP. This brings me to 18 Event VP + 4 Playbook VP = 22VP total. The reward forces Player1 to discard 2 cards, slowing them significantly. After Sudden Death, I keep PUR-9 in hand and have 2 Shinies. I will need 12 more Event VP to trigger endgame (30 Event VP threshold). But at 18 Event VP I would be close to Player1s pace, and the 2-card discard penalty sets them back.

DECISION: Draft ORG-2 from Slot 4 for 3 Shinies. This completes my Sudden Death combo: BLU-1 (rank 1, Magicians) + PUR-8 (rank 8, Time Travelers) + ORG-2 (rank 2, Finders-Keepers) = Sum exactly 11, 3 different factions. A 12VP event is game-changing and the discard-2 punishment against the VP leader is devastating. No other action comes close to this strategic value. The 3-Shiny investment yields the highest possible return.

Turn 24 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (2S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S) (1S on card)	Slot 4 (3S)

Shield Wall **10 VP** Tier 5
4x Super-Dupes. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose an opponent. They either pay you 1 Shiny or give you 1 card of their choice from their hand.

Halftime Show **11 VP** Tier 5
4x Magicians. Sum ≥ 22. Max 1 Free Agent.
Reward: Choose one opponent: Look at 1 Playbook in their hand. Return it. (If no Playbooks: look at their entire hand.)

New Rules! **15 VP** Tier 6
4 cards with the same number (any factions)
Reward: Discard all Lineup/Jumbotron cards to bottom of their decks and refill. All Shinies from discarded Lineup cards go to new recruit in Slot 4.

Sudden Death **12 VP** Tier 6
3 cards from 3 different factions. Sum exactly 11.
Reward: If any opponent has more VP than you: choose one of them; they discard 2 cards from their hand to The Stands. Otherwise: take 2 Shinies from the Bank.

Recruit Deck: 25 | Event Deck: 29 | The Stands: 22

SCOREBOARD

Player1 **15 VP** Event: 14 | PB: 0 | Shinies: 3
Hand: YLW-10 * BLU-7 YLW-2 GRN-6
Events: Limbo Contest (8VP), Convoy (6VP)
Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 2
Hand: PUR-8 PUR-9 BLU-1 ORG-2
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **2 VP** Event: 0 | PB: 0 | Shinies: 6
Hand: PUR-5 YLW-9 ORG-10 * RED-5 GRN-5 BLU-9 ORG-5
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=4)
Player2 drafted ORG-2 from Lineup Slot 4 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: This is the most obvious decision of the game.

1. Complete New Rules! (15 VP) using PUR-5, RED-5, GRN-5, ORG-5 - four cards all with rank 5. This is a 15 VP event, the highest-value event in the entire game. It catapults me from 0 Event VP to 15 Event VP in a single move. The reward also resets the entire Lineup and Jumbotron, giving everyone fresh opportunities but more importantly giving me first crack at the new board on subsequent turns.

2. Any other action. There is no other action worth considering. I have assembled the rarest hand in the game - four cards of the same rank from four different factions. This opportunity may never come again.

TABLE: Player1 at 14 Event VP (15 total), Player2 at 6 Event VP (10 total). After completing New Rules! I will have 15 Event VP, tying Player1 for the lead in Event VP. Player1 needs 16 more Event VP to reach the 30 VP threshold. I will also need 15 more. The game is wide open after this play.

PLAN: Complete New Rules! now. After the event, the reward resets the entire Lineup and Jumbotron. I will have 3 cards remaining (ORG-10 Free Agent, YLW-9 Tinkerer, BLU-9 Magician) plus the Speed Run playbook. These three cards include a Free Agent and two high-rank cards from different factions - great flexibility for future events. My next goal will be to find a small 3-card event to trigger the Speed Run playbook (3 VP) while also building toward another big event.

DECISION: Complete New Rules! for 15 VP. This is the single biggest play possible in the game. Four rank-5s from four different factions is an incredibly difficult hand to assemble, and I spent the last 8 turns carefully collecting each piece. 15 VP brings me from dead last to tied for first in Event VP. The board reset reward also disrupts opponents plans and gives me new opportunities.

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 6
Hand: YLW-9 ORG-10 * BLU-9
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `complete_event` (eventSlot=3, cardIds=['time_travelers_5', 'super_dupes_5', 'prognosticationers_5', 'finders_keepers_5'])
Player3 completed New Rules! [15 VP] with PUR-5, RED-5, GRN-5, ORG-5; reward: reset the Lineup and Jumbotron.

Player1 Thinking:

CANDIDATES: 1. Draft ORG-4 (Slot 1, free): This enables Capture the Flag (5 VP) next turn using BLU-7 (Magician, 7) + YLW-10 (Free Agent as Magician, 10) + ORG-4 (Finders-Keepers, 4). Sum = 21 >= 12. Buddy requirements met: BLU-7 is signed Magician, ORG-4 is signed FK. Free draft preserves my 3 Shinies. 2. Draft PUR-10 (Slot 4, cost 3 Shinies, +4 Shinies on card): Net +1 Shiny and a Free Agent (rank 10 Time Traveler). Two Free Agents would be nice but I cannot immediately complete any event with this. Secret Playbook needs 4 Free Agents which is still 2 away. 3. Draft YLW-8 (Slot 2, 1 Shiny): Tinkerers rank 8. Could form a 6-7-8 run with GRN-6 and BLU-7 for Convoy if it were still available, but Convoy was already completed. No immediate event path. **TABLE:** Player3 has surged to 15 event VP (17 total), overtaking me\! They must have completed a big event (likely Shield Wall or another high-value one). I am at 14 event VP (15 total). Player2 at 10 total. Player3 is now the biggest threat. With only 3 cards in Player3 hand, they are also rebuilding. This is a critical moment -- I need to score quickly to keep pace. Capture the Flag at 5 VP would put me at 19 event VP, still behind Player3 but closing the gap. **PLAN:** Draft ORG-4 now, complete Capture the Flag next turn for 5 VP (bringing me to 19 event VP). The Capture the Flag reward is a free Scramble, which gives me another mystery card. After completion, I keep GRN-6 and YLW-2 in hand plus the Scramble card. Then I need 11 more event VP to reach 30. I should look for mid-to-high tier events: Sudden Death (12 VP) would be transformative but needs sum exactly 11 from 3 factions -- tricky. I need to keep building cards and options. Also, Capture the Flag uses only ranks 4, 7, 10. The Rookie requires ranks 1-5 only, so this does NOT trigger The Rookie (ranks 7 and 10 are outside 1-5). **DECISION:** Draft ORG-4 from Slot 1 for free. It immediately enables a 5 VP event completion next turn with no Shiny cost. In a race where Player3 just took the lead, every VP matters and every free action is precious. The alternative of spending 3 Shinies on PUR-10 for a speculative Free Agent collection does not compare to guaranteed near-term VP.

Recruit Deck: 24 | Event Deck: 28 | The Stands: 26

SCOREBOARD

Player1 **15 VP** Event: 14 | PB: 0 | Shinies: 3
Hand: YLW-10 * BLU-7 YLW-2 GRN-6 ORG-4
Events: Limbo Contest (8VP), Convoy (6VP)
Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 2
Hand: PUR-8 PUR-9 BLU-1 ORG-2
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 6
Hand: YLW-9 ORG-10 * BLU-9
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted ORG-4 from Lineup Slot 1 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: The situation has changed dramatically. Sudden Death is gone. I need to pivot.

1. Draft PUR-10 from Slot 3 (cost 2 Shinies, collect 4 Shinies on it = NET +2 Shinies). A Time Travelers Free Agent rank 10. Combined with PUR-8 and PUR-9, I now have 3 Time Travelers toward Instant Replay (10VP, 4x Time Travelers Sum>=22 Max 1 FA). PUR-8+PUR-9+PUR-10 = sum 27, already exceeds Sum>=22 with just 3 cards. I need ONE more Time Traveler (ranks 1-9 only, since max 1 Free Agent). Additionally, PUR-10 is economically brilliant -- I pay 2 Shinies but collect 4 from the card, netting +2 Shinies. I go from 2 to 4 Shinies.

2. Draft YLW-8 from Slot 1 (free). A Tinkerer rank 8. Does not advance any current Jumbotron event for me. Free is nice but does not progress my game plan.

3. Draft RED-4 from Slot 2 (cost 1 Shiny). A Super-Dupes rank 4. Does not align with any immediate event path.

4. Timeout for 1 Shiny. Wastes a turn when a positive-economy draft exists.

TABLE: Player3 has EXPLODED to 15 Event VP (completed New Rules for 15VP in one shot!). They are now the VP leader at 17 total. Player1 is at 15 total (14 event + 1 shiny bonus). I am at 10 total (6 event + 4 playbook), significantly behind both. I need BIG events to catch up. Instant Replay (10VP) is my best path.

Player3 with 3 cards and 6 Shinies is depleted after their big play. Player1 with 5 cards and 3 Shinies is still building. The race is between Player1 and Player3 at the top, and I need to close the gap fast. At 6 Event VP, I am 24VP away from the 30VP threshold. I cannot afford small events.

PLAN: Draft PUR-10 now (net +2 Shinies economy). I now have PUR-8, PUR-9, PUR-10 as 3 of 4 needed Time Travelers for Instant Replay (10VP). I need one more signed Time Traveler (rank 1-9). Available Time Travelers in the deck: PUR-1 through PUR-7 minus any already used. I will aggressively seek Time Travelers. If one appears in the Lineup, I draft it immediately. Instant Replay (10VP) would bring me to 16 Event VP. The reward (top 5 of Stands, take up to 2 cards) restocks my hand for the next event.

I still hold BLU-1 and ORG-2 which could be used for Capture the Flag (5VP) if I get another Magician with high enough rank.

DECISION: Draft PUR-10 from Slot 3 for 2 Shinies, collecting 4 Shinies from the card. This is the best play by a wide margin: positive economy (+2 net Shinies), 75% completion toward Instant Replay (10VP), and a Free Agent for flexibility. PUR-10 at rank 10 gives massive sum contribution. I go to 4 Shinies with 5 cards in hand (PUR-8, PUR-9, PUR-10, BLU-1, ORG-2).

Turn 27 — Player3

Phase: main

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 4
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 6
Hand: YLW-9 ORG-10 * BLU-9
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=3)
Player2 drafted PUR-10 from Lineup Slot 3 and collected 4 Shinies.

Player3 Thinking:

CANDIDATES: I need to draft a card to enable Capture the Flag (5 VP, 2x Magicians + 1x Finders-Keepers, Sum >= 12). My current hand has BLU-9 (Magician), ORG-10 (FK/Free Agent), YLW-9 (Tinkerer).

1. Draft YLW-8 from Slot 1 (free + collect 1 Shiny). YLW-8 is a Tinkerer rank 8. It does not directly help Capture the Flag, but YLW-8 + YLW-9 = ranks 8+9 consecutive, and ORG-10 (rank 10) makes 8-9-10 - a run for Convoy if it appears. Also YLW-8 can be used to fill generic card count events. Getting it for free + 1 Shiny is great value. After this, I still need another Magician or FK card for Capture the Flag, but the lineup may shift favorably. 7 Shinies gives me flexibility.

2. Draft BLU-3 from Slot 3 (2 Shinies). This gives me 2 real Magicians (BLU-9 + BLU-3), letting ORG-10 serve as the FK card. Then next turn I complete Capture the Flag: BLU-9 + BLU-3 + ORG-10(FK). Sum = 9+3+10 = 22 >= 12. That is 5 VP + 3 VP playbook = 8 VP. But costs 2 Shinies.

3. Draft ORG-7 from Slot 4 (3 Shinies). Then complete with BLU-9 + ORG-10(as Magician) + ORG-7(FK). Sum = 9+10+7 = 26 >= 12. Same result but costs 3 Shinies.

TABLE: Player1 at 14 Event VP (15 total), Player2 at 6 Event VP (11 total). I lead at 15 Event VP (17 total). Player1 is the closest rival at 15 total. Player1 has 5 cards and could be building toward something big. I need to keep scoring to maintain my lead. I need 15 more Event VP to trigger the endgame at 30.

PLAN: The best immediate play is actually to draft YLW-8 for free + 1 Shiny. Here is why: Getting free value now preserves my 6 Shinies for the critical Capture the Flag draft next turn. If BLU-3 slides to Slot 2 (cost 1) or Slot 1 (free) by my next turn, I save even more. YLW-8 also creates a backup plan with the 8-9-10 run for future Convoy events. With 4 cards (YLW-8, YLW-9, ORG-10, BLU-9) I have more flexibility.

If I draft BLU-3 now for 2 Shinies, I can complete Capture the Flag next turn but I spend resources upfront. If BLU-3 gets taken, I lose the Capture the Flag path. That is the risk of waiting.

DECISION: Draft YLW-8 from Slot 1 for free + 1 Shiny. I go to 7 Shinies with 4 cards. YLW-8 + YLW-9 + ORG-10 = 8-9-10 Tinkerer run (if Convoy appears). Next turn I will draft BLU-3 or another Magician for Capture the Flag. The free card + Shiny bonus is too good to pass up when I already lead in VP and can afford to be patient.

Turn 28 — Player1

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S)	Slot 3 (2S)	Slot 4 (3S)

Instant Replay **10 VP** Tier 5
4x Time Travelers. Sum ≥ 22. Max 1 Free Agent.
Reward: Look through top 5 cards in The Stands. Take up to 2 cards into hand.

Capture the Flag **5 VP** Tier 2
2x Magicians + 1x Finders-Keepers. Sum ≥ 12.
Reward: Perform one free Scramble.

Secret Playbook **12 VP** Tier 6
4x Free Agents (any mix of 0 and/or 10)
Reward: Look at top 5 of Recruit Deck. Keep 2. Put other 3 on bottom in any order.

Recruit Deck: 22 | Event Deck: 28 | The Stands: 26

SCOREBOARD

Player1 **15 VP** Event: 14 | PB: 0 | Shinies: 3
Hand: YLW-10 * BLU-7 YLW-2 GRN-6 ORG-4
Events: Limbo Contest (8VP), Convoy (6VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 4
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 7
Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted YLW-8 from Lineup Slot 1 and collected 1 Shinies.

Player1 Thinking:

CANDIDATES: 1. Complete Capture the Flag (5 VP): Use BLU-7 (Magician, rank 7) + YLW-10 (Free Agent as Magician, rank 10) + ORG-4 (Finders-Keepers, rank 4). Sum = 21 >= 12. This is my planned event. 5 VP brings me to 19 event VP. The free Scramble reward gives me another card and board churn. 2. Draft BLU-3 from Slot 2 (1 Shiny): Magicians rank 3. Could potentially help future events but delays VP by at least a turn. With Player3 at 15 event VP and climbing, I cannot afford to wait. 3. Timeout: No. I have an event to complete right now. **TABLE:** Player3 leads at 15 event VP (17 total). I am at 14 event VP (15 total). Player2 at 6 event VP (11 total with playbook). Player3 is the main rival. They have 4 cards and 7 Shinies. If they score again before me, the gap widens dangerously. I need to score NOW and then keep scoring to stay competitive. After this event, I will be at 19 event VP versus Player3 at 15 -- retaking a solid lead. **PLAN:** Complete Capture the Flag now for 5 VP (total 19 event VP). The free Scramble reward gives me: discard Slot 1 card, slide lineup, deal new Slot 4, put Scramble cost on Slot 4 (but Scramble is free here so 0 Shinies), and draw top of Recruit Deck. After completion I have YLW-2 (rank 2) and GRN-6 (rank 6) remaining plus the Scramble draw. Need 11 more event VP to reach 30. Look for tier 3-5 events I can build toward with my remaining cards and new draws. The Rookie playbook still unscored -- this event uses ranks 4, 7, 10 so it does not qualify. **DECISION:** Complete Capture the Flag with BLU-7, YLW-10, ORG-4 for 5 VP. This is the only event completion available and it is excellent value. 5 VP plus free Scramble reward. Retakes the VP lead from Player3. No reason to delay.

SCOREBOARD

Player1 20 VP Event: 19 | PB: 0 | Shinies: 3
Hand: YLW-2 GRN-6 RED-3
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 11 VP Event: 6 | PB: 4 | Shinies: 4
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 17 VP Event: 15 | PB: 0 | Shinies: 7
Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `complete_event` (eventSlot=3, cardIds=['tinkerers_10', 'magicians_7', 'finders_keepers_4'])
Player1 completed Capture the Flag [5 VP] with YLW-10, BLU-7, ORG-4; reward: Player1 performed a free Scramble and drew 1 mystery card. 1 Shinies moved onto the new Slot 4..

Player2 Thinking:

CANDIDATES: I desperately need a 4th Time Traveler for Instant Replay (10VP) but none are in the Lineup. My options:

1. Draft BLU-3 from Slot 1 (FREE). A Magician rank 3. Builds my hand to 6 cards. BLU-1 + BLU-3 = 2 Magicians, potentially useful for future Magician events or mixed events. Not exciting but free and adds hand size for future flexibility. Puts me at 6 cards, closer to events like Opening Ceremony (4 different factions) or other multi-card events.

2. Scramble (cost 2 Shinies). Gamble on finding a Time Traveler. Discards BLU-3 from Slot 1 (losing it), slides lineup, new card in Slot 4, blind draw from deck. Probability of hitting a Time Traveler is roughly 15% per card (maybe 2-3 remaining in 20-card deck). Two chances (Slot 4 reveal + blind draw). Risky and expensive at 2 Shinies. If I whiff, I wasted 2 Shinies and gained a random card.

3. Draft ORG-7 from Slot 2 (cost 1 Shiny). Finders-Keepers rank 7. With ORG-2 that is 2 Finders-Keepers. Could help with Easter Egg Hunt or other FK events if they appear. But no FK events on the Jumbotron.

4. Timeout (earn 1 Shiny). Passive. Could flush The Final Limbo from Slot 1 but I might want that event long-term if I accumulate enough low cards.

TABLE: Player1 at 19 Event VP (completed Capture the Flag for 5VP) is dangerously close to the 30VP threshold. They need 11 more Event VP. Player3 at 15 Event VP is also building fast. I am at 6 Event VP, severely behind. I need to score Instant Replay (10VP) as soon as possible, but I cannot force a Time Traveler to appear.

PLAN: Draft BLU-3 for free now. My priority remains finding a 4th Time Traveler for Instant Replay (10VP). Every turn I will check the Lineup for Time Travelers. If one appears, I draft it immediately regardless of Slot cost. Meanwhile, BLU-3 adds hand size and faction diversity. I now have 4 factions represented: Time Travelers (PUR-8, PUR-9, PUR-10), Magicians (BLU-1, BLU-3), Finders-Keepers (ORG-2). Six cards total enables more event options.

With BLU-1 + BLU-3 (2 Magicians) + ORG-2 (1 FK) I am approaching Capture the Flag requirements (2x Magicians + 1x FK, Sum>=12) but sum = 1+3+2 = 6, far below 12. Would need to swap in higher-rank cards.

DECISION: Draft BLU-3 from Slot 1 for free. In a position where no action directly advances my primary goal, the free card is the best tempo play. It costs nothing, adds hand size, and provides faction diversity. I stay at 4 Shinies with 6 cards. Next turn I continue hunting for a Time Traveler to complete Instant Replay.

SCOREBOARD

Player1 **20 VP** Event: 19 | PB: 0 | Shinies: 3
Hand: YLW-2 GRN-6 RED-3
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 4
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 * BLU-3
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 7
Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted BLU-3 from Lineup Slot 1 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: Current Jumbotron events are all extremely difficult for me. None are completable with my hand (YLW-9, ORG-10, BLU-9, YLW-8).

1. Timeout + flush The Final Limbo (13 VP). Gain 1 Shiny (to 8), bring in a new event. The Final Limbo needs 5 cards with Sum <= 8 - completely impossible with my high-rank hand (8+9+9+10 = 36). Flushing it removes a dead event and brings in something potentially completable. The event deck has 27 cards left - plenty of variety. I need events requiring 3 cards from different factions, runs, or sets - things my YLW/BLU/ORG hand can handle.

2. Draft ORG-7 from Slot 1 (free). Gets me a 5th card (FK rank 7). With ORG-7 I would have YLW-8, YLW-9, BLU-9, ORG-7, ORG-10. This diversifies my hand but still cannot complete any Jumbotron event. I would still need to flush the Jumbotron later.

3. Draft ORG-0 from Slot 4 (3 Shinies). A Free Agent. With ORG-10 + ORG-0 I would have 2 Free Agents. Still not close to Secret Playbook (4 Free Agents) or Sprinkler Ambush (3 rank-0 cards).

TABLE: Player1 at 19 Event VP (20 total) is the biggest threat. They are 11 Event VP from triggering the endgame. Player2 at 6 Event VP (11 total). I am at 15 Event VP (17 total). Player1 is likely to complete another event soon with 3 cards and 3 Shinies. I need to score before Player1 reaches 30 Event VP. Every turn I spend not scoring is a turn closer to Player1 winning.

PLAN: Flush The Final Limbo now to cycle the Jumbotron. With 27 events remaining in the deck, there are many Tier 1-3 events that could appear. I need events like: Obstacle Course (2x Tinkerers + 1x Magician Sum>=12 - I have YLW-8+YLW-9 as Tinkerers + BLU-9 as Magician, sum=26), Wheelbarrow Race (2x Super-Dupes + 1x Tinkerer), or any event I can complete with my high-rank diverse cards.

DECISION: Timeout + flush The Final Limbo. All four current Jumbotron events are dead for me. I need fresh events. The 1 Shiny gain also helps. Not discarding any cards since I need all 4 for flexibility. This is the right play to cycle toward completable events while maintaining resources.

Turn 31 — Player1

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 8
Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `timeout` (discardHandIndices=[], flushEvent=True)
Player3 called Timeout and gained 1 Shiny; cycled The Final Limbo off Jumbotron Slot 1.

Player1 Thinking:

CANDIDATES: 1. Draft ORG-7 (Slot 1, free): Free Finders-Keepers rank 7. Gives me 4 different factions in hand (Tinkerer, Prognost., Super-Dupes, Finders-Keepers), which is crucial for Opening Ceremony (7 VP, 4 different factions) if it appears on the Jumbotron. Also, ORG-7 has rank 7, useful for sum requirements. Builds hand to 4 cards without spending Shinies. 2. Timeout + flush Instant Replay: Gets 1 Shiny and removes Instant Replay (which I cannot complete) from the Jumbotron. New events might be more achievable. But I would not draft a card, keeping my hand small at 3. In a rebuilding phase, card count matters more than Shinies. 3. Draft GRN-2 (Slot 3, 2 Shinies, +1 Shiny): Another Prognostictioner rank 2. Could help with runs (2-3 with RED-3 but different factions). Net cost 1 Shiny (pay 2, get 1 back). Not as good as free ORG-7. **TABLE:** I lead at 19 event VP (20 total). Player3 at 15 event VP (17 total). Player2 at 6 events (11 total). Player3 is my main rival with 8 Shinies and 4 cards. They could be building toward Secret Playbook (12 VP, 4 Free Agents) or Sprinkler Ambush (12 VP, 3 rank-0 cards). If Player3 scores a 12 VP event, they jump to 27 event VP -- very close to 30. I need to keep building and scoring to stay ahead. **PLAN:** Draft ORG-7 for free. This gives me a 4-card hand with 4 factions: YLW-2 (Tinkerer), GRN-6 (Prognost.), RED-3 (Super-Dupes), ORG-7 (FK). Opening Ceremony would be perfect if it appears. Otherwise, these diverse ranks help with various events. I also have 2+3=5 and 6+7=13, giving me potential for sum requirements. The Rookie playbook needs an event with all ranks 1-5. If I use YLW-2 (2) + RED-3 (3) in a small event, those are ranks 1-5 but I need a third card also in 1-5. If I find such a card and event, I can score The Rookie. **DECISION:** Draft ORG-7 from Slot 1 for free. In a rebuilding phase, free cards are essential. ORG-7 adds faction diversity, rank value, and hand size. It preserves my 3 Shinies for future premium drafts. Every card I add now moves me closer to the next event completion.

Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted ORG-7 from Lineup Slot 1 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: No Time Traveler in the Lineup for Instant Replay. But I see a new opportunity: Time Capsule (9VP) on Jumbotron Slot 4.

1. Draft ORG-0 from Slot 3 (cost 2 Shinies). A Finders-Keepers Free Agent rank 0. This could enable Time Capsule (9VP, 3x Time Travelers + 2 Free Agents, Sum>=22). My combination would be: PUR-8 (signed TT, rank 8) + PUR-9 (signed TT, rank 9) + PUR-10 (TT Free Agent, rank 10) + ORG-0 (FK Free Agent counting as TT, rank 0). That is 4 cards: 3+ Time Travelers (PUR-8, PUR-9, PUR-10, plus ORG-0 via Buddy) and 2 Free Agents (PUR-10, ORG-0). Sum = 8+9+10+0 = 27 >= 22. The Buddy System is satisfied since PUR-8 and PUR-9 are signed Time Travelers. If this is legal per the engine, it is a 9VP event! The reward is also excellent: look through top 5 of The Stands, take up to 2 cards.

2. Draft YLW-7 from Slot 1 (free). A Tinkerer rank 7. Does not advance any current event path. Free but unhelpful.

3. Scramble (2 Shinies). Gamble for a Time Traveler. Risky.

4. Timeout. Earn 1 Shiny, maybe flush Instant Replay to bring in new events. But I want to keep Instant Replay available as backup.

TABLE: Player1 at 20 total (19 event + 1 shiny bonus). Player3 at 17 total (15 event). I am at 11 total (6 event + 4 playbook + 1 shiny bonus). Player1 is approaching the 30VP event threshold -- they need 11 more event VP. This is urgent.

PLAN: Draft ORG-0 now. If the engine treats "3x TT + 2 FA" as overlapping (Free Agents can simultaneously satisfy faction AND Free Agent requirements), I can complete Time Capsule (9VP) next turn with PUR-8 + PUR-9 + PUR-10 + ORG-0. This would bring me to 15 Event VP. If not, I still have ORG-0 as a flexible Free Agent for other events. I also keep Instant Replay as a target since I am still just 1 signed Time Traveler short. Time Capsule is a slightly easier path since it needs fewer signed TT cards.

DECISION: Draft ORG-0 from Slot 3 for 2 Shinies. This Free Agent opens the Time Capsule path (9VP) and provides general flexibility. I go from 4 to 2 Shinies with 7 cards in hand. The 2-Shiny investment is justified by the potential 9VP payoff next turn.

Turn 33 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Recruit Deck: 17 | Event Deck: 27 | The Stands: 30

SCOREBOARD

Player1 **20 VP** Event: 19 | PB: 0 | Shinies: 3
Hand: YLW-2 GRN-6 RED-3 ORG-7
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 2
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 * BLU-3 ORG-0 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **17 VP** Event: 15 | PB: 0 | Shinies: 8
Hand: YLW-9 ORG-10 * BLU-9 YLW-8
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=3)
Player2 drafted ORG-0 from Lineup Slot 3 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: The Jumbotron is still full of events I cannot complete. My options:

1. Draft YLW-7 from Slot 1 (free + 1 Shiny). This gives me YLW-7 + YLW-8 + YLW-9 = ranks 7-8-9, a perfect 3-card consecutive run. This is extremely useful for Convoy (6 VP, 3-card run) or any future run event. It also gives me 3x Tinkerers for Drag Race (3 VP) if it appears. The free card + Shiny bonus is great value. With 5 cards I have more options.

2. Timeout + flush Instant Replay. Brings in a new event but does not build my hand. I already did this last turn with limited results.

3. Draft PUR-0 from Slot 4 (3 Shinies). A Free Agent (Time Travelers). Would give me 2 Free Agents (ORG-10 + PUR-0). But costs 3 Shinies and does not help with current events.

TABLE: Player1 at 19 Event VP is dangerous - 11 away from triggering endgame. Player2 at 6 Event VP but 7 cards in hand - likely building something. I am at 15 Event VP leading in events but behind Player1 in total (17 vs 20). I need to score another event to stay competitive. The Jumbotron must cycle before I can score.

PLAN: Draft YLW-7 now for free + Shiny. This creates a triple-Tinkerer run (7-8-9) which opens up multiple event paths: Convoy (3-card run, 6 VP), Drag Race (3x Tinkerers, 3 VP), or Obstacle Course (2x Tinkerers + 1x Magician, 6 VP) using YLW-8 + YLW-9 + BLU-9. Sum would be 8+9+9 = 26 >= 12 for Obstacle Course. Next turn I flush the Jumbotron to bring in these types of events.

DECISION: Draft YLW-7 from Slot 1. Free card + 1 Shiny. Creates a 7-8-9 Tinkerer run and a 3x Tinkerer set. This maximizes my event-completing potential across multiple event types. Going to 9 Shinies maintains economic strength.

SCOREBOARD

Player1 **20 VP** Event: 19 | PB: 0 | Shinies: 3
Hand: YLW-2 GRN-6 RED-3 ORG-7
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 2
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 * BLU-3 ORG-0 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 9
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `recruit_lineup` (slot=1)
Player3 drafted YLW-7 from Lineup Slot 1 and collected 1 Shinies.

Player1 Thinking:

CANDIDATES: 1. Draft GRN-2 (Slot 1, free, +2 Shinies): Free card with 2 bonus Shinies is excellent. GRN-2 (rank 2) gives me a pair of 2s with YLW-2 for Synchronized Swimming (7 VP, 2 pairs of 4 cards) if I find another pair. Also enables Photo Finish if it appears (sum exactly 15 from 3 cards: 2+6+7=15 or 3+6+6 etc). 5 Shinies total after draft gives me future drafting power. 2. Timeout + flush Instant Replay: Gets 1 Shiny and removes an impossible event. But the other 3 events (Secret Playbook, Sprinkler Ambush, Time Capsule) are all also unreachable for me. Flushing one does not solve my Jumbotron problem. Better to draft and build hand. 3. Draft PUR-0 (Slot 3, 2 Shinies): Free Agent, useful but costs 2 Shinies with no Shinies on card. GRN-2 is free AND gives 2 Shinies -- strictly better tempo. **TABLE:** I lead with 19 event VP (20 total). Player3 is at 15 event VP (18 total) with 9 Shinies and 5 cards -- still a threat. Player2 at 6 event VP (10 total). Player3 has been steadily gaining. With 9 Shinies they can afford expensive drafts. The current Jumbotron is terrible for everyone except someone stockpiling Free Agents or TT cards. Player3 might be building toward one of these big events. **PLAN:** Draft GRN-2 this turn. My hand becomes: YLW-2 (2), GRN-2 (2), GRN-6 (6), RED-3 (3), ORG-7 (7). Key observations: (a) pair of 2s for Synchronized Swimming, (b) 2+6+7=15 for Photo Finish, (c) 2+3=5 and 6+7=13 for various sums, (d) 4 different factions for Opening Ceremony. I am well-positioned for multiple events IF they appear on the Jumbotron. My next priority is to find an event I can actually complete. If the Jumbotron stays unchanged, I may need to flush events via Timeout. **DECISION:** Draft GRN-2 from Slot 1 for free. Best available value: free card + 2 bonus Shinies. Creates a pair of 2s for future events. Maintains 5 Shinies for flexibility. No current event is completable so building hand size and resources is the right approach.

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 9
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=1)
Player1 drafted GRN-2 from Lineup Slot 1 and collected 2 Shinies.

Player2 Thinking:

CANDIDATES: PUR-0 (Time Travelers, rank 0, Free Agent) appeared in Slot 2 for 1 Shiny! This is critical for my Time Traveler event strategy.

1. Draft PUR-0 from Slot 2 (cost 1 Shiny, places 1 on Slot 1). A Time Travelers Free Agent rank 0. This gives me 4 Time Travelers total: PUR-0, PUR-8, PUR-9, PUR-10. For Time Capsule (9VP, 3x TT + 2 FA, Sum>=22): I could use PUR-8 + PUR-9 (signed TT Buddies) + PUR-0 (FA as TT) + PUR-10 (FA as TT) + ORG-0 (FA as TT) = 5 cards. 3+ Time Travelers satisfied, 3 Free Agents (need only 2), sum = 0+8+9+10+0 = 27 >= 22. This might work!

Alternatively for Instant Replay (10VP, 4x TT, Sum>=22, max 1 FA): PUR-0 + PUR-8 + PUR-9 = 3 TT with 1 FA. Need 1 more SIGNED TT. Still short. But having PUR-0 means if ANY signed TT appears (PUR-1 through PUR-7), I can complete Instant Replay immediately.

2. Draft GRN-4 from Slot 1 (free). A Prognosticationer rank 4. Does not help with any Time Traveler event. Adds hand size but at 7 cards I am approaching the 8-card limit.

3. Timeout. Earn 1 Shiny but waste a turn. No.

TABLE: Player1 at 20 total (19 event VP) is closing in on the 30VP threshold -- only 11 more event VP needed. Player3 at 18 total (15 event VP) is also building. I am at 10 total (6 event VP), critically behind. I MUST score a big event soon or the game is over before I can catch up.

PLAN: Draft PUR-0 now. I will have 8 cards in hand (at the limit). If Time Capsule is completable next turn with PUR-8 + PUR-9 + PUR-0 + PUR-10 + ORG-0, that is 9VP bringing me to 15 Event VP. If not, I continue hunting signed Time Travelers for Instant Replay (10VP). I may need to discard cards at end of turn to stay at hand limit 8.

DECISION: Draft PUR-0 for 1 Shiny. This is the most strategically important card available. It adds a 4th Time Traveler and 3rd Free Agent, potentially enabling Time Capsule (9VP) immediately. Even if Time Capsule does not work with this combination, PUR-0 brings me closer to Instant Replay (10VP) since I now only need 1 signed TT to complete 4x TT with max 1 FA. I go to 1 Shiny with 8 cards (at hand limit).

Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 1
Hand: PUR-8 PUR-9 BLU-1 ORG-2 PUR-10 * BLU-3 ORG-0 * PUR-0 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 9
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=2)
Player2 drafted PUR-0 from Lineup Slot 2 and collected 0 Shinies.

Player3 Thinking:

CANDIDATES: The Jumbotron is still full of events needing Time Travelers and Free Agents I do not have. I must flush.

1. Timeout + flush Instant Replay. Gain 1 Shiny (to 10), cycle Instant Replay (4x Time Travelers) out for a new event. This is the 2nd flush in recent turns. With 27 events in the deck, the odds of getting a Tinkerer event (Drag Race, Obstacle Course, Pit Stop), a run event (Convoy, Marathon), or a set event (Substitution, Photo Finish, Synchronized Swimming) are decent.

2. Draft BLU-6 from Slot 2 (1 Shiny). A second Magician. With BLU-9 + BLU-6 I could work toward Obstacle Course (2x Tinkerers + 1x Magician) or other Magician events. But the problem remains: no completable events on the Jumbotron.

3. Hire Agent for The Big Game (4 VP, complete an event worth 9+ VP). Costs 5 Shinies. Adds a 2nd playbook but I already have Speed Run. Both are combo playbooks that trigger when completing events. Having 2 playbooks is nice but I need events to complete first.

TABLE: Player1 at 19 Event VP (20 total) - stable, 11 from endgame trigger. Player2 at 6 Event VP (10 total) with 8 cards - likely building something big. I am at 15 Event VP (18 total). The urgency is increasing. Player1 could score a big event any turn now.

PLAN: Flush Instant Replay. The new event might be something I can build toward. I have a strong hand for: 3x Tinkerers (Drag Race 3VP, Pit Stop 11VP), 3-card run 7-8-9 (Convoy 6VP), 2x Tinkerers + Magician (Obstacle Course 6VP), 4-card events using Tinkerers + Free Agent. Keep all cards for maximum flexibility.

DECISION: Timeout + flush Instant Replay. Must cycle the Jumbotron. Cannot complete any current event. Going to 10 Shinies gives me massive flexibility. The next event from the deck could be the breakthrough.

Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `timeout` (discardHandIndices=[], flushEvent=True)
Player3 called Timeout and gained 1 Shiny; cycled Instant Replay off Jumbotron Slot 1.

Player1 Thinking:

CANDIDATES: 1. Draft BLU-6 (Slot 2, 1 Shiny): Magicians rank 6. This gives me 5 of 6 factions needed for Group Photo (16 VP). I would then need just one Time Traveler to complete the most valuable event in the game. With 6 cards in hand and 5 factions, I am one card away from a game-ending play. 16 VP + my existing 19 = 35 event VP, well over the 30 threshold. 2. Hire The Agent for The Big Game (4 VP playbook): Complete event worth 9+ VP. If I pull off Group Photo, The Big Game triggers too. But this costs 5 Shinies (all I have), leaving me unable to draft. The Big Game only matters if I complete a 9+ VP event, and Group Photo is not yet guaranteed. Too risky. 3. Draft GRN-4 (Slot 1, free, +1 Shiny): Free Prognosticationer rank 4. Does not add a new faction. Gives 1 Shiny but does not advance Group Photo. 4. Timeout + flush Secret Playbook: Removes one impossible event and brings in a new event. Gets 1 Shiny. But this delays drafting BLU-6 for Magicians. Opponents could draft it or it could slide out. **TABLE:** I lead with 19 event VP (20 total). Player3 at 15 event VP (18 total) with 10 Shinies. Player2 at 6 event VP with 8 cards in hand. Player3 with 10 Shinies is very dangerous -- they can afford any draft. If Player3 is building toward a big event, they could score 12-15 VP in a single turn. I need to either score Group Photo (game over) or find intermediate events quickly. The Jumbotron is unfriendly except for Group Photo which I am uniquely positioned to pursue. **PLAN:** Draft BLU-6 this turn for 1 Shiny. My hand becomes: YLW-2 (2, Tinkerer), GRN-6 (6, Prognost.), RED-3 (3, Super-Dupes), ORG-7 (7, FK), GRN-2 (2, Prognost.), BLU-6 (6, Magician). Factions: Tinkerer, Prognost., Super-Dupes, FK, Magician. Missing: Time Travelers. Next turn, I need to find and draft a TT card. If the Lineup offers one, I draft it. If not, I may Scramble (2 Shinies, I would have 4) to churn the Lineup hoping for TT. Or I wait for the Lineup to refresh naturally. For Group Photo, I need exactly 1 card from each faction (6 cards). I have duplicates: two Prognostictioners (GRN-6, GRN-2) and two cards with rank 6 (GRN-6, BLU-6). I can use GRN-6 for Prognost. and BLU-6 for Magician. The 6 cards would be: YLW-2 (Tinkerer), GRN-6 or GRN-2 (Prognost.), RED-3 (Super-Dupes), ORG-7 (FK), BLU-6 (Magician), TT-any (Time Traveler). **DECISION:** Draft BLU-6 from Slot 2 for 1 Shiny. This is the critical piece for Group Photo. Being one card away from 16 VP (game-ending) is worth 1 Shiny. The alternative of not drafting the Magician and hoping one appears later is too risky -- it might not. Lock in the Magician now.

Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=2)
Player1 drafted BLU-6 from Lineup Slot 2 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: No complete_event actions available. I am stuck with 8 cards at hand limit, 1 Shiny, and no completable event. I need to restructure.

1. Timeout + discard BLU-1 and BLU-3 (indices 2 and 5). Earn 1 Shiny (to 2), discard the 2 Magicians I have been holding that do not contribute to any achievable event. BLU-1 (rank 1) and BLU-3 (rank 3) were originally for Capture the Flag (gone from Jumbotron) or Sudden Death (also gone). Freeing hand space lets me draft cards that actually advance my strategy. I keep my 4 Time Traveler cards (PUR-0, PUR-8, PUR-9, PUR-10) and 2 Free Agents (ORG-0, ORG-2) for maximum flexibility.

2. Timeout + discard ORG-2 and BLU-3. Similar reasoning. ORG-2 is a Finders-Keepers rank 2 that was for Sudden Death. But ORG-2 is a signed FK card that could serve as a Buddy for ORG-0 in some events. I should keep ORG-2 over BLU-1 for Buddy purposes. Actually, BLU-1 could buddy for... no Magician event is on the Jumbotron. Discard BLU-1 and BLU-3.

3. Draft GRN-4 from Slot 1 (free) but I am at hand limit 8 already. Cannot draft without space.

4. Timeout without discards. Gets 1 Shiny but stays at 8 cards with dead weight.

TABLE: Player1 at 20 total with 6 cards is the biggest threat. Player3 at 18 total with 10 Shinies and 5 cards is dangerous. I am at 10 total, far behind. The game is slipping away. I need a big event SOON. Time Capsule (9VP) and Secret Playbook (12VP) are my best targets.

For Time Capsule (3x TT + 2 FA, Sum>=22): I have 2 signed TT (PUR-8, PUR-9) and 3 FAs (PUR-0, PUR-10, ORG-0). The engine is not offering this as completable. I suspect the engine requires the "3x TT" portion to be 3 separate signed TT cards, not counting FAs toward the faction count AND the FA count simultaneously.

For Secret Playbook (4x Free Agents): I have 3 FAs (PUR-0, PUR-10, ORG-0). Need 1 more FA. If I can draft a 4th Free Agent, I score 12VP!

PLAN: Discard BLU-1 and BLU-3 (dead cards). Go to 6 cards and 2 Shinies. Next turns, aggressively draft Free Agents for Secret Playbook (12VP). I need just 1 more Free Agent (rank 0 or 10 from any faction). There are roughly 9 remaining Free Agents in the deck. Or target Time Capsule if a signed TT appears. With PUR-1 at Slot 4 costing 3 Shinies, I might be able to afford it in 2 turns.

DECISION: Timeout, discarding BLU-1 and BLU-3. This cleans my hand of dead weight, earns 1 Shiny, and creates space for future drafts. I do NOT flush Secret Playbook from the Jumbotron since that is one of my target events. I end at 6 cards, 2 Shinies.

Turn 39 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Hand: YLW-2 GRN-6 RED-3 ORG-7 GRN-2 BLU-6
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **10 VP** Event: 6 | PB: 4 | Shinies: 2
Hand: PUR-8 PUR-9 ORG-2 PUR-10 * ORG-0 * PUR-0 *
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 10
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `timeout` (discardHandIndices=[2, 5], flushEvent=False)
Player2 called Timeout and gained 1 Shiny; discarded 2 cards.

Player3 Thinking:

CANDIDATES: Still cannot complete any Jumbotron event. Must flush again.

1. Timeout + flush Secret Playbook (12 VP). Gains 1 Shiny (to 11). Cycles another dead event. Secret Playbook needs 4 Free Agents - I have only 1 (ORG-10). After this flush, the remaining events will be Sprinkler Ambush, Time Capsule, Group Photo, plus the new event from the deck.

2. Draft GRN-4 from Slot 1 (free + 2 Shinies). Adds a 4th faction (GRN). With YLW, ORG, BLU, GRN = 4 factions. Could help with Opening Ceremony (4 different factions, 7 VP) if it appears. But the fundamental problem is the Jumbotron, not my hand.

3. Hire Agent for The Big Game (4 VP). But I need to complete events first.

TABLE: Player1 at 19 Event VP with 6 cards - still dangerous. Player2 at 6 VP with 6 cards. I am at 15 Event VP. The race is tightening. I need to score soon before Player1 closes the gap.

PLAN: Keep flushing until a Tinkerer or run event appears. I am well positioned for: Drag Race (3x Tinkerers, 3 VP), Pit Stop (4x Tinkerers, 11 VP), Obstacle Course (2x Tinkerers + 1x Magician, 6 VP), Convoy (3-card run, 6 VP), or Photo Finish (3 cards sum exactly 15 = 7+8=15? No, need exactly 3 cards. YLW-7+YLW-8=15? That is only 2 cards. YLW-7+BLU-9=16, too high. Not easy.).

DECISION: Timeout + flush Secret Playbook. Must cycle the Jumbotron. Going to 11 Shinies. Not discarding cards.

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 11
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `timeout` (discardHandIndices=[], flushEvent=True)
Player3 called Timeout and gained 1 Shiny; cycled Secret Playbook off Jumbotron Slot 1.

Player1 Thinking:

CANDIDATES: 1. Draft PUR-1 (Slot 4, 3 Shinies): THIS IS THE GAME-WINNING PLAY. PUR-1 (Time Travelers, rank 1) is the final faction I need for Group Photo (16 VP). After drafting, I will have all 6 factions: Tinkerer (YLW-2), Prognosticationer (GRN-6 or GRN-2), Super-Dupes (RED-3), Finders-Keepers (ORG-7), Magician (BLU-6), Time Traveler (PUR-1). Next turn I complete Group Photo for 16 VP, jumping from 19 to 35 event VP and triggering The Standing Ovation. 2. Draft GRN-4 (Slot 1, free, +2 Shinies): Free card with 2 bonus Shinies. But this is a Prognosticationer -- a faction I already have. Does NOT advance Group Photo. Taking this instead of PUR-1 means another player might draft PUR-1 or the Lineup could shuffle, losing my chance. 3. Timeout: Gets 1 Shiny but wastes a critical turn. The Time Traveler is right there in the Lineup. Every turn I wait is a turn Player3 (11 Shinies, 5 cards) could score a massive event and overtake me. **TABLE:** I lead with 19 event VP (20 total). Player3 at 15 event VP (18 total) with 11 Shinies and 5 cards. Player3 is DANGEROUS -- 11 Shinies means they can afford any draft and with 5 cards they could be close to completing a high-tier event. If Player3 scores Sprinkler Ambush (12 VP) or Trophy Case (9 VP), they jump to 27 event VP. I cannot afford to delay. Player2 at 6 event VP is not a threat. **PLAN:** Draft PUR-1 this turn (3 Shinies, leaving me with 1). Next turn: complete Group Photo (16 VP). Use these 6 cards: YLW-2 (Tinkerer), GRN-6 (Prognosticationer), RED-3 (Super-Dupes), ORG-7 (Finders-Keepers), BLU-6 (Magician), PUR-1 (Time Traveler). After completion: 19+16 = 35 event VP. This triggers The Standing Ovation. Remaining cards: GRN-2 (the extra Prognosticationer). Final tally: 35 event VP + Playbook VP (if I can score The Rookie in the final round) + Shiny bonus (1 Shiny / 3 = 0 VP). Total: 35+ VP minimum. This wins the game. **DECISION:** Draft PUR-1 from Slot 4 for 3 Shinies. This is the most important play of the game. It completes my 6-faction collection for Group Photo next turn. 16 VP is the highest single-event payout in the game. Combined with my existing 19 event VP, this triggers the endgame at 35 VP. No other play comes close to this strategic value. The 3 Shiny cost is trivial compared to winning the entire game.

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 11
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `recruit_lineup` (slot=4)
Player1 drafted PUR-1 from Lineup Slot 4 and collected 0 Shinies.

Player2 Thinking:

CANDIDATES: I am still unable to complete any Jumbotron event. The engine does not offer Time Capsule as completable, which means my understanding of the faction+FA overlap is incorrect or I am missing a requirement. I need to pivot and rebuild.

1. Draft GRN-4 from Slot 1 (FREE + 3 Shinies on it!). A Prognostications rank 4. This is an exceptional economy play: free card plus 3 Shinies. I go from 2 to 5 Shinies. GRN-4 adds Prognostication faction coverage, which I did not previously have. With PUR (Time Travelers), ORG (Finders-Keepers), and now GRN (Prognostications), I have 3 factions. Plus Free Agents give me flexibility. The Shinies let me draft from expensive slots in future turns.

2. Draft GRN-7 from Slot 2 (cost 1 Shiny + collect 1). Net 0 Shinies. A Prognostication rank 7. Higher rank but costs money and nets nothing.

3. Scramble (cost 2 Shinies). Gamble for a useful card. With only 2 Shinies, risky.

4. Timeout. Earn 1 Shiny, discard cards. But the free GRN-4 with 3 Shinies is strictly better than Timeout for economy (3 Shinies vs 1 Shiny, plus a free card).

TABLE: Player1 at 19VP event, Player3 at 15VP event. Both approaching 30VP threshold. I am at 6VP event, severely behind. The game may end before I can catch up. I need to maximize every turn.

PLAN: Draft GRN-4 for free + 3 Shinies. I now have: PUR-0, PUR-8, PUR-9, PUR-10, ORG-0, ORG-2, GRN-4 = 7 cards. I have 3 factions plus Free Agents. Group Photo (16VP, 1 of each 6 factions) would be incredible but I need 6 different factions. I have TT, FK, GN = 3 signed factions. With Free Agents (PUR-0, PUR-10, ORG-0) I can cover the missing 3 (Super-Dupes, Tinkerers, Magicians). But Buddy System requires at least 1 signed player per claimed faction. I only have signed players for TT (PUR-8, PUR-9), FK (ORG-2), and GN (GRN-4). The other 3 factions would be claimed by Free Agents alone with no Buddy. That does not work.

I need at least 1 signed SD, 1 signed TK, and 1 signed MG card for Group Photo. That is 3 more specific cards -- very unlikely to assemble in time.

For now, focus on building Shinies and watching for any achievable event.

DECISION: Draft GRN-4 from Slot 1 for free + 3 Shinies. Best economy play available. +1 card, +3 Shinies. I go to 5 Shinies with 7 cards. The Shinies give me purchasing power for future critical drafts.

Turn 42 — Player3

Phase: main

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S)
GRN-7	BLU-5	RED-8	BLU-10 *

JUMBOTRON (AVAILABLE EVENTS)

Sprinkler Ambush **12 VP** Tier 6
3 cards of number 0 (any factions)
Reward: Draft Lineup Slots 2 & 3 and take any Shinies from those cards for free. Slide and refill.

Time Capsule **9 VP** Tier 4
3x Time Travelers + 2 Free Agents. Sum ≥ 22.
Reward: Look through top 5 cards in The Stands. Take up to 2 cards into hand.

Group Photo **16 VP** Tier 6
One card showing each of the six faction symbols (6 cards total)
Reward: None.

Trophy Case **9 VP** Tier 5
4x Finders-Keepers. Sum ≥ 22. Max 1 Free Agent.
Reward: Each opponent either discards 1 card of their choice to The Stands or pays you 1 Shiny.

Recruit Deck: 11 | Event Deck: 27 | The Stands: 32

SCOREBOARD

Player1 **19 VP** Event: 19 | PB: 0 | Shinies: 1
Hand: YLW-2 GRN-6 RED-3 ORG-7 GRN-2 BLU-6 PUR-1
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 5
Hand: PUR-8 PUR-9 ORG-2 PUR-10 * ORG-0 * PUR-0 * GRN-4
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 11
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted GRN-4 from Lineup Slot 1 and collected 3 Shinies.

Player3 Thinking:

CANDIDATES: Another round of an inaccessible Jumbotron. I must keep flushing.

1. Timeout + flush Sprinkler Ambush (12 VP). Sprinkler Ambush needs 3 rank-0 cards - impossible for me. Flushing it brings in a new event. Going to 12 Shinies. There are 27 events in the deck with many Tinkerer and generic events remaining. Events like Drag Race (3x Tinkerers), Obstacle Course (2x Tinkerers + Magician), Convoy (3-card run), Pit Stop (4x Tinkerers), or Photo Finish (sum exactly 15) would all work for my hand.

2. Draft GRN-7 for free. Adds diversity but does not solve the Jumbotron problem.

3. Hire Agent for The Big Game (4 VP). Could be worth 4 VP later but costs 5 Shinies and takes my action.

TABLE: Player1 at 19 Event VP, stable but with 7 cards now. Player2 at 6 VP with 7 cards and building. I lead at 15 Event VP. The game could accelerate at any moment. I need more VP.

PLAN: Continue cycling the Jumbotron. My hand (3x Tinkerers 7-8-9, BLU-9, ORG-10 FA) is perfectly built for Tinkerer events and runs. The event deck has not shown me anything useful in the last 3 flushes, but mathematically there are many events remaining that I can complete. Persistence will pay off.

DECISION: Timeout + flush Sprinkler Ambush. Keep cycling. 12 Shinies gives me extreme economic strength for when the right event appears.

Turn 43 — Player1

4x Finders-Keepers. Sum ≥ 22. Max 1 Free Agent.
Reward: Each opponent either discards 1 card of their choice to The Stands or pays you 1 Shiny.

Guessing Booth **3 VP** Tier 1
3x Prognostications
Reward: Look at top 5 of Recruit Deck. Take 1. Put the rest back in any order.

New events appeared this turn

Recruit Deck: 11 | Event Deck: 27 | The Stands: 32

SCOREBOARD

Player1 **19 VP** Event: 19 | PB: 0 | Shinies: 1
Hand: YLW-2 GRN-6 RED-3 ORG-7 GRN-2 BLU-6 PUR-1
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP)
Playbooks: The Rookie (3VP)

Player2 **11 VP** Event: 6 | PB: 4 | Shinies: 5
Hand: PUR-8 PUR-9 ORG-2 PUR-10 * ORG-0 * PUR-0 * GRN-4
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 12
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player3 `timeout` (discardHandIndices=[], flushEvent=True)
Player3 called Timeout and gained 1 Shiny; cycled Sprinkler Ambush off Jumbotron Slot 1.

Player1 Thinking:

CANDIDATES: 1. Complete Group Photo (16 VP) using GRN-2 as the Prognosticationer: YLW-2 (Tinkerer) + RED-3 (Super-Dupes) + ORG-7 (FK) + GRN-2 (Prognosticationer) + BLU-6 (Magician) + PUR-1 (Time Traveler). 6 different factions. 16 VP brings me from 19 to 35 event VP, triggering The Standing Ovation. Keep GRN-6 (rank 6) as my remaining card -- higher value for potential future play in the finish-the-round turns. 2. Complete Group Photo using GRN-6 as the Prognosticationer: Same VP outcome but keeps GRN-2 (rank 2). GRN-6 is better to keep for its higher rank and better sum contribution. So option 1 is preferred. 3. Any other action: ABSOLUTELY NOT. I have the chance to score 16 VP and end the game. Any delay risks an opponent scoring first. **TABLE:** I have 19 event VP. Player3 has 15 event VP (18 total) with 12 Shinies. Player2 has 6 event VP (11 total) with 7 cards. If I do NOT complete Group Photo now, Player3 could score a big event on their turn. Player3 has been steadily building resources. Completing Group Photo NOW locks in my massive lead and triggers the endgame. After the round finishes, final tally: my 35 event VP + potential Playbook VP + Shiny bonus vs Player3 at ~18 total + whatever they score in their remaining turns. Even if Player3 scores a 12 VP event in the remaining round, they would reach 27 event VP + Shiny bonus ~4 = 31. I would have 35+. I win. **PLAN:** Complete Group Photo. This triggers The Standing Ovation -- finish the round so all players have equal turns. My final tally will be: 35 event VP + The Rookie playbook (3 VP if I can score it, but unlikely since I only have 1 card left) + Shiny bonus (1 Shiny = 0 VP). Total baseline: 35 VP. Player3 needs at least 35 VP in final tally to tie, which means they need 17 more event VP (currently at 18 total). Even if they score 12 VP event, they reach 27 event + ~4 shiny = ~31. I win comfortably. **DECISION:** Complete Group Photo with YLW-2, RED-3, ORG-7, GRN-2, BLU-6, PUR-1 for 16 VP. Keep GRN-6 as remaining card. This ends the game with 35 event VP. The championship trophy is mine. Every draft, every Timeout, every decision built toward this moment -- assembling all 6 factions for the ultimate 16 VP event.

Turn 44 — Player2

Phase: standing_ovation

LINEUP (DRAFT MARKET)

Slot 1 (FREE) (1S on card)	Slot 2 (1S) (1S on card)	Slot 3 (2S)	Slot 4 (3S)

Player3 **18 VP** Event: 15 | PB: 0 | Shinies: 12
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player1 `complete_event` (eventSlot=2, cardIds=['tinkerers_2', 'super_dupes_3', 'finders_keepers_7', 'prognostications_2', 'magicians_6', 'time_travelers_1'])
Player1 completed Group Photo [16 VP] with YLW-2, RED-3, ORG-7, GRN-2, BLU-6, PUR-1.

Player2 Thinking:

CANDIDATES: The game is in Standing Ovation -- this is my LAST turn. Player1 won with 35 Event VP. I cannot complete any event. I need to maximize my final score.

1. Draft GRN-7 from Slot 1 (free + 1 Shiny on it). Go to 6 Shinies = 2 shiny bonus VP. Total = 6 event + 4 playbook + 2 shiny = 12VP. Also gets a card, though irrelevant.

2. Timeout for 1 Shiny. Same economy: go to 6 Shinies = 2 VP bonus. Total = 12VP. Could also discard cards, but why.

3. Draft BLU-10 from Slot 4 (cost 3 Shinies). Go to 2 Shinies = 0 VP bonus. Total = 10VP. Worse.

Both options 1 and 2 give the same result. Draft GRN-7 for the free card in case it somehow matters.

TABLE: Player1 at 35 Event VP has won the game. Player3 at 18VP total. I am at 10-11VP total, in last place. The game is effectively over.

PLAN: Take the free card + Shiny to maximize final score at 12VP.

DECISION: Draft GRN-7 from Slot 1 for free + 1 Shiny. Maximizes shiny bonus to 2VP. Final expected score: 12VP total. The game is decided but I play it out.

Turn 45 — Player3

Phase: game_over, standing_ovation

Reward: Look through top 5 cards in The Stands. Take up to 2 cards into hand.

Trophy Case 9 VP Tier 5
4x Finders-Keepers. Sum ≥ 22. Max 1 Free Agent.
Reward: Each opponent either discards 1 card of their choice to The Stands or pays you 1 Shiny.

Guessing Booth 3 VP Tier 1
3x Prognostications
Reward: Look at top 5 of Recruit Deck. Take 1. Put the rest back in any order.

Strategy Meeting 10 VP Tier 4
3x Prognostications + 2 Free Agents. Sum ≥ 22.
Reward: Draw top 3 of Recruit Deck. Keep 1. Discard 2 to The Stands.

Recruit Deck: 10 | Event Deck: 26 | The Stands: 38

SCOREBOARD

Player1 35 VP Event: 35 | PB: 0 | Shinies: 1
Hand: GRN-6
Events: Limbo Contest (8VP), Convoy (6VP), Capture the Flag (5VP), Group Photo (16VP)
Playbooks: The Rookie (3VP)

Player2 12 VP Event: 6 | PB: 4 | Shinies: 6
Hand: PUR-8 PUR-9 ORG-2 PUR-10 * ORG-0 * PUR-0 * GRN-4 GRN-7
Events: Tug of War (3VP), Drag Race (3VP)
Scored Playbooks: The Perfect 10 (4VP)

Player3 18 VP Event: 15 | PB: 0 | Shinies: 12
Hand: YLW-9 ORG-10 * BLU-9 YLW-8 YLW-7
Events: New Rules! (15VP)
Playbooks: The Speed Run (3VP)

Player2 `recruit_lineup` (slot=1)
Player2 drafted GRN-7 from Lineup Slot 1 and collected 1 Shinies.

Player3 Thinking:

CANDIDATES: This is my final turn in the Standing Ovation. Player1 has already triggered the endgame at 35 Event VP.

1. Timeout (no flush, no discard). Gain 1 Shiny to 13. My Shiny bonus is already maxed at 3 VP (12/3=4 but capped at 3). The extra Shiny does not change my score. However, there is nothing better to do.

2. Any draft - would not help since I cannot complete events.

3. Hire Agent - costs 5 Shinies for a playbook I likely cannot score on this turn.

TABLE: Player1 at 35 Event VP, Player2 at 6 Event VP (12 total), I am at 15 Event VP. Final scores will be approximately: Player1: 35 + 0 playbook + 0 Shiny = 35. Player3: 15 + 0 + 3 Shiny = 18. Player2: 6 + 4 playbook + 2 Shiny = 12. I finish second.

PLAN: Take the Timeout to end my turn cleanly. The game is over. Player1 dominated with a massive Group Photo (16 VP) completion.

DECISION: Timeout, no flush, no discard. Simple and clean final action.

Player3 `timeout` (discardHandIndices=[], flushEvent=False)

Player3 called Timeout and gained 1 Shiny.

Game Over

The game has ended.

Player Feedback

Player1 Feedback

Player1 Post-Game Feedback - Contests of Chaos (Seed 29)

Final Result

- **Winner: Player1** with 35 total VP (35 event VP, 0 playbook VP, 0 Shiny bonus)
- Player2: 12 total VP (6 events, 4 playbook, 2 Shiny bonus)
- Player3: 18 total VP (15 events, 0 playbook, 3 Shiny bonus)
- Game lasted 45 turns

Overall Experience and Fun Factor: 8/10

The game was genuinely enjoyable. The drafting tension -- watching the Lineup evolve, reading which cards opponents might want, deciding between spending Shinies now versus hoarding them -- created real decision pressure every turn. The sliding Lineup market where cards accumulate Shinies is a particularly clever mechanism.

Strategies I Tried and Why

Phase 1: Limbo Contest Rush (Turns 1-7)

I started with a Tinkerer-heavy hand including two Free Agents (YLW-10 and YLW-0). I recognized early that Limbo Contest (8 VP, 4 cards Sum <= 8) was achievable with low-rank cards. I drafted BLU-0 (another Free Agent, rank 0) and GRN-1 (rank 1) specifically to enable this. Completed on Turn 7 for 8 VP with sum = 0+0+4+1 = 5. This was extremely efficient -- 8 VP from 4 relatively weak cards.

Phase 2: Convoy Run (Turns 10-19)

After Limbo Contest consumed my low-rank cards, I pivoted to building a 0-1-2 consecutive rank run for Convoy (6 VP). Drafted ORG-1 and GRN-0 to complete the run. Completed on Turn 19 for 6 VP plus a free Scramble.

Phase 3: Capture the Flag (Turns 22-28)

With BLU-7 (Magician) remaining from earlier drafts, I drafted ORG-4 (FK) for free and completed Capture the Flag (5 VP) using BLU-7 + YLW-10 (Free Agent as Magician) + ORG-4. The Free Agent flexibility was crucial here.

Phase 4: Group Photo Pursuit (Turns 31-43)

This was the defining strategic arc. With 19 event VP, I realized Group Photo (16 VP) was my path to victory. I deliberately drafted cards from missing factions: ORG-7 (FK), GRN-2 (Prognostictioner), BLU-6 (Magician), and finally PUR-1 (Time Traveler). Completing Group Photo on Turn 43 for 16 VP jumped me to 35 event VP and triggered The Standing Ovation.

What Felt Balanced/Unbalanced

Balanced

- **Slot pricing** feels right. The tension between paying 3 for Slot 4 versus waiting for it to slide is excellent.
- **Shinies on skipped cards** creates interesting value decisions. Sometimes the "bad" card in Slot 1 is worth drafting just for the Shinies piled on it.
- **Tier 1 events** (3 VP) being easy to complete gives everyone early scoring opportunities.

Potentially Unbalanced

- **Group Photo (16 VP) may be too strong.** It single-handedly won me the game. Going from 19 VP to 35 VP in one action felt overwhelming. By comparison, the next-highest single event is New Rules (15 VP). The lack of a sum requirement or max Free Agent restriction on Group Photo makes it achievable for anyone who patiently collects one card per faction. It might benefit from either (a) reducing to 12-14 VP, (b) adding a sum requirement like Sum >= 20, or (c) requiring "no Free Agents" to force genuine faction diversity.
- **The Rookie playbook (3 VP)** was impossible for me to score despite holding it all game. Events that use only ranks 1-5 are rare because most events either need multiple cards of one faction (forcing you to take what's available) or have sum >= 12/22 requirements that push toward higher ranks. Consider either broadening the condition (ranks 1-6?) or increasing the VP to 4-5 to reward the difficulty.

Most Interesting Decisions

1. **Starting roster choice (Turn 0):** Keeping two Free Agents (YLW-10, YLW-0) over faction-specific cards. This maximized flexibility and paid off throughout the game.
2. **Limbo Contest assembly:** Recognizing on Turn 1 that BLU-0 + my existing cards enabled an 8 VP event within a few turns. The card evaluation -- "this rank-0 card is actually premium because of Limbo Contest" -- was satisfying.
3. **Group Photo pursuit (Turns 31-43):** The multi-turn commitment to collecting all 6 factions while opponents were building their own engines. Every turn I drafted a faction card instead of building for smaller events was a gamble that the Time Traveler would appear in the Lineup before an opponent completed a game-ending event.
4. **PUR-1 draft (Turn 40):** Spending 3 of my 4 Shinies on Slot 4 for the final puzzle piece. The cost was steep but the payoff was immediate.

Suggestions for Improvement

1. **Jumbotron stagnation:** For several rounds (Turns 22-37), the Jumbotron was filled with events requiring Time Travelers and Free Agents that nobody could complete. This created a dead period. Consider a mechanism for faster Jumbotron cycling (e.g., if all 4 events stay for X rounds, auto-flush Slot 1).
2. **Group Photo balance:** As noted above, 16 VP with no restrictions beyond "one of each faction" may be too powerful for the difficulty involved. I only needed 6 specific cards, and Free Agents could fill gaps.
3. **Playbook diversity:** I only saw two Playbook options during setup (The Rookie, The Windfall). Both felt hard to achieve organically. The Agent action at 5 Shinies for more Playbooks is very expensive relative to the VP gain.

Confusing Rules or Mechanics

- The Buddy rule for Free Agents was clear in the rules but I was uncertain whether it was enforced correctly in all cases. No bugs noticed though.
- The distinction between "end of turn" and "combo" Playbook timing could be confusing for new players. A clearer explanation of when each type can be scored would help.

How Playbooks Affected Strategy

The Rookie playbook (3 VP, complete event using only ranks 1-5) had almost no impact on my strategy. I kept looking for opportunities to score it but the condition was too restrictive. Most events either needed high-rank cards for sum

requirements or I naturally had mixed-rank hands. I ended up never scoring it. The 3 VP was not enough to justify warping my strategy away from higher-VP events.

Memorable Moments

1. **Turn 7 -- Limbo Contest:** The satisfaction of assembling four low-rank cards (sum = 5) for 8 VP right under opponents' noses while they were still building their hands.
2. **Turn 40 -- PUR-1 appears in Slot 4:** After several turns of no Time Travelers in the Lineup, PUR-1 finally appeared. The relief and excitement of seeing the final Group Photo piece was palpable.
3. **Turn 43 -- Group Photo completion:** Playing 6 cards from 6 factions for 16 VP to win the game. The entire second half of the game was building toward this one play, and it delivered.

Game Feel and Pacing

The game had good pacing overall. Early turns (1-10) felt fast and exciting with easy events to score. Mid-game (turns 10-30) had a rebuilding lull. Late game (turns 30-43) was tense as I raced to assemble Group Photo while watching Player3 accumulate Shinies. The total length (45 turns across 3 players, about 15 turns per player) felt appropriate -- not too short, not overstaying its welcome.

Event / Reward Feedback

- **Limbo Contest reward** (free Slot 2 draft) was nice but underwhelming for an 8 VP event.
- **Convoy reward** (free Scramble) was useful for replenishing my hand after using 3 cards.
- **Capture the Flag reward** (free Scramble) -- same comment, solid utility.
- **Group Photo reward** (none) -- the "glory is the reward" flavor text is funny but correct. 16 VP needs no additional reward.
- Free Scramble rewards felt like the most common reward type. Some variety would be welcome -- perhaps more "take from The Stands" or "steal from opponent" rewards to create more player interaction.

Player2 Feedback

Contests of Chaos - Player2 Feedback (Seed 29)

Overall Experience

Fun Factor: 6/10

The game has strong fundamentals -- the sliding market, the Shiny economy on Lineup cards, and the tension between drafting and completing events are all compelling. However, my experience was marred by a long mid-game drought where I could not complete any events despite holding a carefully assembled hand. This felt frustrating rather than strategic.

Most Fun Moments

- **Turn 5: Completing Tug of War** as the first player to score an event. The satisfaction of being the first to put points on the board was real, even for a modest 3VP event. The 3-Shiny reward felt like a strong economic engine turn.

- **Turn 14: The Drag Race + Perfect 10 combo.** Completing Drag Race with YLW-5, YLW-6, and RED-10 (Free Agent as Tinkerer) for 3VP, then immediately scoring The Perfect 10 playbook for 4VP. A 7VP turn from one action felt incredibly rewarding. This was the highlight of my game.

- **The PUR-10 economy play (Turn 26):** Drafting PUR-10 from Slot 3 for 2 Shinies while collecting 4 Shinies from the card (net +2 Shinies). The Shiny accumulation mechanic on Lineup cards creates genuinely interesting timing decisions.

Most Interesting Decisions

- **Starting roster (Turn 0):** Choosing between keeping three Super-Dupes for an immediate Tug of War vs. keeping faction diversity. The interaction between hand composition and available Jumbotron events created a real puzzle from the very first decision.
- **Turn 5: Complete Tug of War now or draft RED-5 and build toward Shield Wall?** The tension between scoring early (3VP + 3 Shinies) vs. building toward a bigger payoff (10VP Shield Wall) was excellent. I went with the tempo play and it paid off.
- **Turn 23: Drafting ORG-2 from Slot 4 for 3 Shinies** to set up Sudden Death (12VP). Investing 3 Shinies for a specific event combo felt like the right kind of strategic commitment.

What Felt Balanced/Unbalanced

Balanced

- **The Shiny economy on Lineup cards** is one of the best mechanics in the game. Watching Shinies accumulate on neglected cards creates genuine tension between "do I draft what I need" vs. "do I grab that pile of gold."
- **Slot pricing** is elegant. The way cards slide left and become cheaper over time creates dynamic market decisions.
- **Playbook VP** added meaningful hidden information and long-term planning. The Perfect 10 (4VP) gave me a secondary objective that influenced my drafting.

Potentially Unbalanced

- **Time Capsule / "Faction + Free Agent" events seem very hard to complete.** I spent many turns trying to assemble Time Capsule (3x Time Travelers + 2 Free Agents, Sum >= 22) but the engine never recognized my combinations as valid. With PUR-8 (signed TT), PUR-9 (signed TT), PUR-0 (FA TT), PUR-10 (FA TT), and ORG-0 (FA FK), I expected to satisfy "3x Time Travelers + 2 Free Agents" but the engine disagreed. Either the requirement is much more restrictive than the rules suggest, or there is an engine bug around how Free Agents overlap with faction counts in "X faction + Y Free Agent" events.
- **Player1 scored 35 Event VP vs. my 6 Event VP.** A nearly 6:1 ratio suggests something is off -- either I made catastrophic strategic errors, or the game can snowball when one player hits their events early and others fall behind. Player1 completed Limbo Contest (8VP) early and never looked back. My inability to find the right cards for my target events (Instant Replay, Time Capsule) left me stranded.
- **The gap between Tier 1 events (3VP) and high-tier events (9-16VP) is enormous.** After completing two 3VP events, I needed to find a high-VP event to stay competitive, but those events require very specific 4-5 card combinations that are hard to assemble.

Strategies I Tried and Why

1. **Super-Dupes rush (Turns 1-5):** Drafted three Super-Dupes for an early Tug of War completion. This worked well as a tempo play.
2. **Tinkerer + Free Agent combo (Turns 8-14):** Drafted RED-10 and YLW-5 to complete Drag Race with my existing YLW-6. This was my best sequence -- a planned 7VP turn with the playbook trigger.
3. **Time Traveler build (Turns 17-38):** Assembled PUR-8, PUR-9, PUR-10, PUR-0 to target Instant Replay (10VP) or Time Capsule (9VP). This strategy FAILED because I could never find a 4th signed Time Traveler for Instant Replay (max 1 FA), and the engine did not accept my combination for Time Capsule. I was stuck with 4 Time Travelers in hand for 20+ turns with no way to use them.

Slow or Boring Parts

- **Turns 29-44 were extremely frustrating.** I had 6-8 cards in hand that I could not use for any available event. Every turn was "check if there is a Time Traveler or Free Agent in the Lineup; there is not; take a free card or Timeout." This felt like being locked out of the game.
- **The hand limit (8 cards) became constraining** while I was trying to assemble a large event. I had to discard cards (BLU-1, BLU-3) that could have been useful for different events, just to make room for more Time Travelers.

Rules or UX Confusions

The "X Faction + Y Free Agent" requirement is unclear

The most significant confusion was how events like Time Capsule (3x Time Travelers + 2 Free Agents, Sum >= 22) actually work. The rules state Free Agents "can count as any faction" and events with Soapbox Derby (3x Tinkerers + 2 Free Agents) suggest 5 total cards. But: - Can a Free Agent that is already of the named faction (e.g., PUR-10, a Time Traveler rank 10) count as BOTH one of the "3x Time Travelers" AND one of the "2 Free Agents"? - Or do you need 3 separate signed faction cards PLUS 2 additional Free Agents (always 5 total)? - The engine appeared to require the latter interpretation, but the rules text is not explicit about this.

This ambiguity cost me the entire mid-to-late game. I believed I could complete Time Capsule with 4 cards (PUR-8, PUR-9, PUR-10, ORG-0) and was wrong.

Buddy System interaction with overlapping requirements

When an event asks for "3x Faction + 2 Free Agents," do the Free Agents use the Buddy System to count as the faction? If so, you need at least 1 signed Buddy of that faction. But if the 3 faction cards can include Free Agents (via Buddy), then the "2 Free Agents" requirement is just "2 of your played cards must have rank 0 or 10." This interpretation was not clear from the rules.

How Playbooks Affected My Strategy

The Perfect 10 (4VP) was a strong playbook that positively influenced my strategy. It encouraged me to draft a Rank 10 Free Agent (RED-10), which I then used in Drag Race. The 4VP payoff from a single playbook scoring was significant -- it represented 33% of my total VP.

However, after scoring The Perfect 10, I had no playbook and no easy way to get another one. The Agent costs 5 Shinies, which felt too expensive when I was also trying to draft cards for events. The tension between spending Shinies on The Agent vs. saving them for Lineup drafts was interesting in theory, but in practice I could never afford The Agent.

Suggestions for Improvement

1. **Clarify the "X Faction + Y Free Agent" event requirements** in the rules. Explicitly state whether Free Agents of the named faction can count toward both the faction and Free Agent requirements simultaneously, or whether the requirements are fully separate.
2. **Consider more Tier 1-2 events in the deck** or a mechanism to ensure the Jumbotron always has at least one achievable event. When the Jumbotron showed only Tier 4-6 events, it felt impossible to score.
3. **The Standing Ovation might need a "catch-up round"** or allow more than one final turn. Player1 at 35VP vs. my 6VP event suggests the game can become one-sided. A mechanism where trailing players get extra turns or can score bonus VP in the final round could make the endgame more exciting.

4. **Consider making PUR-0/PUR-10 (Free Agents that are already Time Travelers) more clearly differentiated** from other faction Free Agents when used in "X Time Travelers + Y Free Agents" events. The dual identity is confusing.

Game Feel and Pacing

The early game (Turns 1-14) was excellent. Quick drafts, early event completions, playbook scoring -- everything felt dynamic and engaging. The mid-game (Turns 17-38) was where it fell apart for me. Assembling high-VP events requires very specific card combinations, and if the Lineup does not provide the right cards, you can spend many turns doing nothing productive. The late game (Turns 38-44) felt predetermined -- Player1 was too far ahead to catch.

The game would benefit from more ways to convert a large hand of "wrong" cards into progress. Perhaps a "trade 3 cards for 1 from the deck" action, or events that reward hand diversity rather than faction specialization.

Event / Reward Feedback

- **Tug of War (3VP, reward: 3 Shinies):** Clean, simple, satisfying early event. Good design.
- **Drag Race (3VP, reward: free Slot 2 draft):** The free draft reward is nice but modest. Felt appropriate for 3VP.
- **Time Capsule (9VP):** The requirement was confusing (see above). The reward (top 5 Stands, take 2) is strong.
- **Instant Replay (10VP):** "Max 1 Free Agent" combined with needing 4 Time Travelers is very restrictive. There are only 11 Time Traveler cards total and only 9 are signed (ranks 1-9). Getting 3 of 9 specific cards is extremely unlikely without dedicated drafting.
- **Group Photo (16VP, no reward):** The "no reward" is thematic but feels punishing for such a difficult event.

Player3 Feedback

Player3 Feedback - Contests of Chaos Playtest (Seed 29)

Overall Experience and Fun Factor: 6/10

The game has a strong core drafting mechanic and the Jumbotron creates genuine tension about which events to pursue. However, this particular game was frustrating because the Jumbotron became stuck on events that required factions I did not have (Time Travelers, Free Agent-heavy events) for the entire second half of the game. I spent roughly 5 consecutive turns calling Timeouts to flush events, which felt repetitive and passive.

Most Fun Moments

- The New Rules! completion was the highlight of the game. Carefully assembling four rank-5 cards from four different factions over 8 turns, then dropping a 15 VP event in one shot, felt genuinely satisfying. Going from 0 Event VP to 15 VP in a single play was a dramatic swing.
- The early game drafting decisions were interesting, especially choosing free Slot 1 cards that came with accumulated Shinies.

Most Interesting Decisions

- The setup roster choice between keeping faction diversity vs. faction concentration was meaningful. I chose diversity (PUR-5, YLW-9, ORG-10) over Time Traveler concentration, which turned out to be the right call since it enabled the New Rules! path.
- Deciding whether to draft ORG-8 for 3 Shinies to set up the 8-9-10 Convoy run vs. taking a free card. I committed to the Convoy plan but Player1 completed it before me, showing the risk of multi-turn setups.

- The tension between "draft to build my hand" vs. "timeout to flush dead events" was a genuine strategic dilemma in the mid-to-late game.

What Felt Balanced/Unbalanced

Balanced: - The Shiny economy on Lineup cards creates interesting value calculations. Free cards with Shinies on them feel great to take. - The Slot pricing system (0/1/2/3) creates genuine tradeoffs. - The variety of event types (faction-based, runs, sets, sum requirements) rewards flexible drafting.

Potentially Unbalanced: - New Rules! at 15 VP feels extremely powerful. Completing it basically gave me half the VP needed to win in one action. If you can assemble the quad, it dominates all other events by a large margin. - Group Photo at 16 VP is similarly dominant. Player1 won largely by completing Group Photo. - The late game can become a "flush loop" where a player cannot complete any Jumbotron event and just repeatedly calls Timeouts to cycle. I spent turns 30-42 doing almost nothing productive because no accessible events appeared. - Player order advantage: Player1 was able to complete both Convoy and Capture the Flag on turns where I had been planning to complete them. Going third in a 3-player game means events you are working toward can get sniped.

Strategies I Tried

1. **Early diversity drafting** (turns 3-12): Focused on getting one card from each faction and picking up free/cheap cards with Shinies. This gave me great flexibility but delayed scoring.
2. **New Rules! quad assembly** (turns 12-24): Recognized I had three rank-5s and systematically found the fourth. This was my most successful strategy, yielding 15 VP.
3. **Convoy run setup** (turns 18-24): Tried to build an 8-9-10 run but the event was completed by Player1 before I could use it.
4. **Jumbotron flush cycle** (turns 30-42): Repeatedly flushed dead events hoping for Tinkerer or run events. This was necessary but unproductive for many turns.

Slow or Boring Parts

- Turns 30-42 were the weakest stretch. I had a strong Tinkerer-heavy hand (7-8-9 run, Free Agent, Magician) but the Jumbotron kept showing events requiring Time Travelers, Free Agents (4x), and rank-0 cards. I had no way to interact with any of them. Calling Timeout repeatedly without meaningful progress felt like wasted turns.
- The legal actions list for Timeouts is very long (every combination of discards x flush/no-flush). This is fine for the engine but overwhelming to scan through.

How Playbooks Affected My Strategy

- I chose The Speed Run (3 VP for completing an event with 3 or fewer cards) as my playbook. It was a reasonable choice for the early game.
- However, I never triggered it because my only event completion was New Rules! (4 cards, not 3). The Jumbotron never showed me a 3-card event I could complete after my New Rules! play.
- The playbook became dead weight in the late game. I considered Hiring Agent for a second playbook (The Big Game at 4 VP) but never pulled the trigger since I could not complete events.
- Player2 scored their playbook (4 VP) early and it contributed meaningfully to their total.

Rules or UX Confusions

- The Buddy rule for Free Agents is clear once understood but could trip up new players. I had to think carefully about which card "counts as" which faction in multi-faction events.
- The interaction between Free Agents and faction requirements needs careful attention. A Free Agent (like ORG-10) can be used as Finders-Keepers OR as another faction for an event, but not both simultaneously. This is clear in the rules but easy to mis-plan.

Suggestions for Improvement

1. **Jumbotron cycling**: Consider a mechanic where if no player completes an event for X turns, the oldest Jumbotron slot automatically flushes. This prevents the "dead Jumbotron" problem where all events are too hard for anyone.
2. **Event deck composition**: The late-game event draw was very skewed toward rare/difficult events (4x Free Agents, 3x rank-0, etc.). More Tier 1-3 events mixed in would keep the game flowing.
3. **Wildcard action**: An action that lets you "re-roll" all 4 Jumbotron events (at a higher cost than a single flush) would give players more agency over stalled boards.
4. **Shiny cap feedback**: The 3 VP maximum from Shinies means that once you have 9+ Shinies, additional Shinies have zero marginal value. The game could communicate this threshold more clearly or allow some other use for excess Shinies.

Game Feel and Pacing

- **Early game** (turns 1-12): Excellent pacing. Drafting feels meaningful, events are accessible, and resource management is tight.
- **Mid game** (turns 12-24): Strong. The New Rules! assembly was a satisfying long-term project that paid off.
- **Late game** (turns 24-45): Pacing collapsed. The Jumbotron stalled with inaccessible events, and the game devolved into repeated Timeouts. Player1 then completed Group Photo (16 VP) for a runaway victory.

Event / Reward Feedback

- **New Rules! reward** (reset all Lineup/Jumbotron): This is thematically cool and strategically impactful, but it can benefit opponents as much as the completing player.
- **Tier 5-6 events** dominate the endgame. Player1 won by completing two massive events (Limbo Contest 8 VP + Convoy 6 VP + Capture the Flag 5 VP + Group Photo 16 VP = 35 VP). The VP curve between tiers is quite steep.
- **Convoy's reward** (free Scramble) felt appropriate for a 6 VP event.
- Many events I could not evaluate because they never appeared while I had the cards for them (Drag Race, Obstacle Course, Pit Stop, Photo Finish, Substitution). My Tinkerer-heavy hand was well-built but the event deck did not cooperate.
